HISTORICAL NOTE

Amherst College bears the name not of an individual founder or promoter, nor of a religious denomination or dogma, but of the town in which it is located. The fact is significant. From its early years Amherst was the home of liberal-minded men who desired for their children better educational advantages than could be afforded by the old-time district schools. Through the plodding decades succeeding the close of the Revolution, however, this desire had to remain unrealized, until in 1812 the people of the town, among whom was a goodly number of college graduates, took steps to found a school of higher education, the Amherst Academy, a school of much distinction and usefulness in its day, which received its charter in 1816, the same year in which the earlier founded Hopkins Academy in Hadley was incorporated. From Amherst Academy, dedicated to the promotion of "morality, piety, and religion," and to "the instruction of youth in the learned languages," came in quite limited process of time Amherst College, whose immediate object, as expressed by Noah Webster at the laying of the corner-stone, was "that of educating for the gospel ministry young men in indigent circumstances, but of hopeful piety and promising talents." The address from which these words are quoted was delivered August 9, 1820. From this date the erection of the first building, the present South College, proceeded apace, aided by heartily given contributions of money, labor, and materials, both from Amherst and several surrounding towns; so that on September 18, 1821, the building completed, exercises of dedication and inauguration were held in the church building of the First Parish, now College Hall, and Amherst College, with a president, two professors, and forty-seven students, was on the following day opened for its growing

and honorable service to the community, the commonwealth, and the world. From the beginning its ideals have been of the highest, tolerating no limitations. "I should be wholly averse," wrote the first President in his letter of acceptance, "to becoming united with any institution which proposes to give a classical education inferior to that given in any of the colleges in New England."

After two adverse votes in the Legislature the College finally secured a charter from the Commonwealth, the date of its approval being February 21, 1825. A number of students in the intervening classes, being compelled to graduate without a degree, received their degrees from Union College, on suitable certificates from Amherst. Of the charter just mentioned a few words are all that the present sketch permits, or that are pertinent to present conditions. As to the Board of Trustees, it was "provided, . . . that the number of members (including the president of said college for the time being, who shall *ex officio* be one of said corporation) shall never be greater than seventeen"; and as to keeping that number good, it was in the same section "provided, further, that as vacancies shall occur in said Board, they shall be so filled that the said Board shall as soon as may be, and forever after, consist of seven clergymen and ten laymen." To legislate for so long ahead, however, is hazardous. "Forever after" is a good while. It does not take account of changes in conditions and in the spirit of the times. And such changes came, radical and far-reaching, long before the forever was well under way. Accordingly, in 1916, when it was felt that the large proportion of clergymen to laymen no longer adequately represented the alumni body, this stipulation of having seven clergymen on the Board was repealed.

The first five vacancies that occurred in the Board were filled by vote of the Legislature; but when, fifty years after

the founding of the college, the number of alumni had become sufficient to warrant it, the alumni were empowered to choose five members of the Board, electing one each year as their terms of service expired. Regarding instructors and students, it was enacted (Section 6), "That no instructor in said college shall ever be required by the trustees to profess any particular religious opinions as a test of office; and no student shall be refused admission to or denied any of the privileges, honors or degrees of said college on account of the religious opinions he may entertain."

The charter contains a curious section (Section 7), which is here mentioned for its historic and perhaps we may say providential interest. "And be it further enacted," the passage naïvely runs, "That if it shall hereafter appear to the Legislature of this Commonwealth lawful and expedient to remove Williams College to the town of Amherst, and the President and Trustees of Williams College shall agree so to do, the Legislature shall have full power to unite Williams and Amherst Colleges into one university at Amherst, on such terms and conditions and under such government as shall be agreed upon by the majority of a board of seven commissioners, of whom," etc. This enactment was made, it will be noted, four years after the first President of Amherst had resigned the presidency of Williams in order to come to this, as he deemed, more suitable town for a college, and brought with him fifteen students from Williamstown. The question of this transfer to Amherst was for some years a quite acute one, not agitated by the people of Amherst but by the ministers and others in the towns of western Massachusetts, and discussed, so far as can be ascertained, without any acrimony between the colleges. The providential interest intimated above lies in the fact that the union of the colleges was not effected. Both colleges, we may be sure, are the better for it. (J. F. G.)

The general government of the College is vested in the Board of Trustees. Its immediate direction is vested in the Faculty, who are empowered by the Trustees to determine the topics and order and method of study, and to make such rules as may be deemed necessary for the best regulation of the College.

The corporate name of the institution is "The Trustees of Amherst College."

We append here a list of the Presidents, with a few items of their lives and services.

The first President, Rev. Zephaniah Swift Moore, D.D., was born in Palmer, November 20, 1770; was graduated 1793 at Dartmouth College; at the time of his call to Amherst was President of Williams College, which office he resigned as stated above; was President, 1821 to 1823.

The second President, Rev. Heman Humphrey, D.D., was born in West Simsbury, Conn., March 26, 1779; was graduated from Yale College, 1805; was called to the presidency of Amherst from a pastorate in Pittsfield; was President, 1823 to 1845.

The third President, Rev. Edward Hitchcock, D.D., LL.D., was born in Deerfield, May 24, 1793; was a special student of theology and science at Yale College, 1826, from which institution he had already received the honorary degree of A.M. in 1818; was elected from the faculty to the presidency of Amherst; was President, 1845 to 1854.

The fourth President, Rev. William Augustus Stearns, D.D., LL.D., was born in Bedford, Mass., March 17, 1805; was educated at Harvard and at Andover, and was ordained in the Congregational Church, 1831; was President and Pastor of the College Church, 1854 to 1876.

The fifth President, Rev. Julius Hawley Seelye, D.D., LL.D., was born in Bethel, Conn., September 14, 1824; was graduated from Amherst College, 1849, and from Auburn

Theological Seminary, 1852; was Professor of Mental and Moral Philosophy at Amherst, 1858 to 1890; was elected to Congress, 1874; was President and Pastor of the College Church, 1876 to 1890.

The sixth President, Merrill Edwards Gates, Ph.D., LL.D., L.H.D., was born in Warsaw, N. Y., April 6, 1848; was graduated from the University of Rochester, 1870; was called to Amherst from the presidency of Rutgers College, 1890; was President of Amherst College, 1890 to 1899.

The seventh President, Rev. George Harris, D.D., LL.D., was born in East Machias, Me., April 1, 1844; was graduated from Amherst College, 1866, and from Andover Theological Seminary, 1869; was called to Amherst from Andover, where he was Professor of Christian Theology, 1899; was President, 1899 to 1912.

The eighth President, Alexander Meiklejohn, Ph.D., LL.D., was born in Rochdale, England, February 3, 1872; was graduated from Brown University, 1893, and from Cornell University (Ph.D.), 1897; was called to Amherst from Brown University, where he was Dean and Professor of Logic and Metaphysics, 1912; was President and Professor of Logic and Metaphysics, 1912-1924.

The ninth President, George Daniel Olds, LL.D., was born in Middleport, N. Y., October 14, 1853; was graduated from the University of Rochester, 1873; was called to Amherst from the University of Rochester, where he was Professor of Mathematics, 1891; was Professor of Mathematics at Amherst, 1891-1923, and Dean, 1910-1922; was President of the College and Walker Professor of Mathematics, 1923-1927.

The tenth President, Arthur Stanley Pease, Ph.D., was born in Somers, Conn., September 22, 1881; was graduated from Harvard University, A.B. 1902, Ph.D., 1905; was called to Amherst from the University of Illinois, where he was Professor of Latin, 1924; was Professor of Latin at Amherst, 1924-1927; was elected President, June, 1927.

DEGREES

BACHELOR OF ARTS

The Degree of Bachelor of Arts is conferred upon students of Amherst College who have satisfactorily met the requirements prescribed for that degree. The plan of studies leading to the Degree of Bachelor of Arts is arranged on the basis of a four years' course to be pursued by students in residence at the College.

Plans are offered, however, which enable candidates for the degree to complete the course of study in less than four years either wholly at Amherst or in part at other colleges. (See page 56.)

Diplomas are graded as *rite*, *cum laude*, *magna cum laude*, *summa cum laude*, according to scholarship.

Summa cum laude rank is fixed at ninety-three per cent., *magna cum laude* at eighty-eight per cent., *cum laude* at eighty per cent., and *rite* at seventy per cent.

A detailed statement of the curriculum will be found on page 71.

MASTER OF ARTS

The Degree of Master of Arts is conferred upon Bachelors of Amherst College and of other colleges that confer the Bachelor's degree under conditions equivalent to those at Amherst College, who, having spent one year in residence at Amherst, have satisfactorily met the requirements prescribed for that degree.

For a detailed statement of these requirements see page 57.

ADMISSION

All correspondence concerning admission should be addressed to the Secretary of the Faculty

While scholarship is the primary basis for admission, in all cases character, ability, scholastic history and general achievement will be taken into consideration in making any selective choice.

SUBJECT REQUIREMENTS

The subjects which may be presented in satisfaction of the requirements for admission to the Freshman Class, together with the number of points at which each is valued, are given in the following list. The basis of valuation is one point for a course pursued for a school year, with the understanding that a satisfactory year's work in any subject cannot be accomplished in less than one hundred and twenty sixty-minute hours or their equivalent.

Subject	Credit
Required: 4 years English	3 points
4 years Latin,* or	
3 years Latin and either 1 point in Advanced Mathematics	4 "
or a third year of a second foreign language	
(Not less than 3 years Latin accepted)	
Elementary and Intermediate Algebra	2 "
1 year Geometry	1 "
2 years second foreign language	2 "
1 year History (Ancient preferred)	1 "
Elective: 2 years credits from:	2 "
Biology	Botany
Chemistry	History
Foreign Language (at least two years, or a third year)	
Advanced Mathematics	Music (Harmony)
Physics	Physiography
Physiology	Zoölogy
Total	15 points

* Or 3 years Greek, 3 points. In this case 3 years elective credits must be presented instead of 2.

ANCIENT LANGUAGE REQUIREMENT

To satisfy the degree requirement, candidates who present entrance credit for four years of Latin continue Latin for at least one year in College.

Candidates who present entrance credit for three years of Latin together with either one point in advanced mathematics or a third year of a second foreign language may meet the requirement of the College in ancient languages as follows:

(1) Those having credit for Latin 1, 2, 4 may (a) take at least two years of Latin in college, one of which is a course in Vergil; or (b) discontinue Latin and begin the study of Greek, continuing that subject for three years.

(2) Those having credit for Latin 1, 2, 5 may (a) continue in Latin, taking the course of the Freshman year in that subject, and either pass an examination in Latin 4 later, or take Sophomore Latin in College; or (b) discontinue Latin and begin the study of Greek, continuing that subject for three years.

Candidates who present entrance credit for three years of Greek may meet the requirement in ancient languages by taking Greek for at least one year in College.

It should be noted that all such adjustments are made subject to the general requirement of fifteen points for admission and twenty year courses in College.

APPLICATION FOR ADMISSION

A blank form of application for admission will be sent by the Secretary of the Faculty to anyone desiring it. This form when properly filled out indicates the subjects which the candidate expects to present for admission and the manner in which these credits are to be secured.

Candidates for admission are urged to file their appli-

cations with the Secretary of the Faculty before the beginning of the last year of the preparatory course in order that the plan of studies for this last year may be made in conformity with the requirements for admission to Amherst College. The application must be accompanied by a registration fee of ten dollars and a photograph of the applicant.

PRESENTATION OF CREDITS

The full fifteen points of credit should be completed in June. Credits may be presented by College Entrance Examination Board examinations, Regents' examinations if the grade is 70% or better, or by acceptable school records at accredited schools.

In case College Entrance Examination Board examinations are taken in June, the "Scholastic Aptitude Test" should also be taken.

COLLEGE ENTRANCE EXAMINATION BOARD

Examinations of June 17-22, 1929

Blank forms for the "Application for Examination" and the "Teacher's Recommendation" may be obtained from the Secretary of the College Entrance Examination Board upon request by mail. The Application should be returned to the College Entrance Examination Board, 431 West 117th Street, New York City. The Recommendation should be sent directly to the Committee on Admission of the college concerned.

Applications for examination must be received by the Secretary of the Board on or before the dates specified below:

For candidates who wish to be examined in the United States at points east of the Mississippi River or on the Mississippi

May 27

For candidates who wish to be examined in the United States at points west of the Mississippi River or in Canada	May 20
For candidates who wish to be examined in centers outside of the United States, Canada, or Asia	May 6
For candidates who wish to be examined in Asia	April 22

Every application for examination must be accompanied by the examination fee, which is \$10.00 for all candidates. This fee should be remitted by postal order, express order, or draft on New York, payable to the College Entrance Examination Board.

When a candidate has failed to obtain the required blank form of application for examination the usual examination fee will be accepted if the fee arrive not later than the specified date accompanied by a memorandum containing the name and address of the candidate, the exact examination center selected, and a list of the subjects in which the candidate expects to take the Board examinations.

An application for examination received later than the date specified above will be accepted when it is possible to arrange for the examination of the candidate concerned, but only upon payment of an additional fee of \$5.00.

The designation of the center to which the candidate will go for examination is regarded as an indispensable part of the application for examination. A list of places at which examinations will be held in June, 1929, will be published about March 1. Requests that the examinations be held at particular points should be transmitted to the Secretary of the College Entrance Examination Board not later than February 1.

Candidates should report for a morning examination at 8:45 and for an afternoon examination at 1:45, Standard or Daylight Saving Time, according to the usage of the local public schools. Under no circumstances will a candi-

date be admitted to the Scholastic Aptitude Test after 9:00 A.M.

Detailed definitions of the requirements in all examination subjects are given in a circular of information published annually about December 1 by the College Entrance Examination Board. Upon request a single copy of this document will be sent to any teacher without charge. In general a charge of twenty-five cents, which may be remitted in postage, will be made.

In Latin, Greek, Mathematics, and the second foreign language the final examination in the subject must be taken not earlier than the June of the year preceding the year of entrance to College.

ADMISSION WITHOUT EXAMINATION

(a) *From Schools in New England.*—From preparatory schools which have been approved by the New England College Entrance Certificate Board certificates of fitness to enter College are received in place of entrance examinations. A preliminary certificate should be filed immediately after the close of the first half of the final year of preparation, and a supplementary certificate at the close of the school year in June.

In mathematics no certificate is acceptable unless some branch of the work has been pursued or reviewed within the two years preceding the date of the student's admission to College. In any foreign language which is to be continued during Freshman year no certificate is acceptable unless the work has been studied or reviewed within the year preceding the date of the student's admission to College. In the case of candidates who present more than one modern language, certificates are acceptable provided at least one of these languages has been pursued during the year preceding the date of admission to College. Certificates for advanced

mathematics are accepted with the understanding that in such cases the candidate is required to take a year of mathematics in College. In general the amount of work required in each subject is indicated in the detailed description given later under subjects for examinations.

(b) *From Schools Outside of New England.*—Candidates from approved schools outside of New England may secure credit for admission without examination in those subjects in which their school record in the judgment of the Committee on Admission warrants it. It will be the general policy of the Committee to accept for credit without examination only such records as are at least as high as the school's own "certifying grade." Records will be considered from schools which are on the approved list of the North Central Association of Colleges and Secondary Schools, the Association of Colleges and Secondary Schools of the Southern States, or the Association of Colleges and Secondary Schools of the Middle States and Maryland, unless exception be made. In determining the eligibility of other schools to the approved list the College follows in general the method of the New England College Entrance Certificate Board.

The reports of school records are made on forms printed by the College and furnished to principals of approved schools. These reports supply the Committee on Admission with such information regarding the scholastic record and character of the candidate as to enable it to decide what credits may be granted toward admission without examination. A preliminary report blank will be sent in January to principals for those of their pupils who have already filed with the Secretary their applications for admission in the following September. This preliminary report should be returned as soon as possible after the first half of the school year; so that the candidate may be notified as early as possible as to his status at that time with regard to

admission. A final decision will be made after the receipt of a supplementary report at the close of the school year.

The full fifteen points of credit should be completed in June. In mathematics no school record will be accepted for credit unless some branch of this subject has been studied within the two years preceding the date of the student's admission to College. School records in advanced mathematics will be accepted for credit only with the understanding that the student is required to take a year of mathematics in College. No school record will be accepted for credit in any modern language which is to be continued during Freshman year unless it has been studied or reviewed during the year preceding the date of admission to College.

ADMISSION CREDITS BY REGENTS' EXAMINATIONS

Examinations given by the Regents of the State of New York may be accepted in place of entrance examinations to the extent to which they cover the requirements for admission to Amherst College, provided the Regents' grade is 70 per cent or higher. In Latin, Mathematics, and the second foreign language the final examination in the subject must be taken not earlier than the June of the year preceding the year of entrance to College. The candidate must make special request of the State Department of Education to forward to the Secretary of the Faculty, as soon as possible after the January examinations of the last year of preparation are recorded, its official record slip giving all the Regents' grades then on record. Immediately after the June examinations, the candidate for entrance in the following September should send an unofficial report of his grades in the June examinations to the Secretary; he should also make special request of the State Department of Education to have the final record forwarded to the College.

ANTICIPATION OF COLLEGE COURSES BY EXAMINATION

Students who have completed in their preparatory schools studies corresponding to courses given in Amherst College may obtain credit for such courses by examination in accordance with the following rules:

1. The proposed credit must be in excess of the entrance requirements.
2. It must be presented at or before the time of admission to college.
3. Advanced credit in French B, German B, and mathematics may be obtained by College Board examination in June, provided the grade is seventy per cent or better.
4. Special examinations for obtaining other advanced credits will be given in September upon application and payment of the required special examination fee.
5. All applications for examinations in September for advanced credit must be filed before September first with the Secretary of the Faculty.
6. Credit thus obtained may be used:
 - a. In anticipation of required courses.
 - b. To count toward graduation in three years. (See page 56.)

Such credit may not be used to reduce the number of courses in any year nor as a substitute for a delinquency subsequently incurred.

7. Students will not be allowed advanced credit by certificate or examination for work done privately or by correspondence.

ADMISSION FROM OTHER COLLEGES OR INSTITUTIONS OF COLLEGIATE RANK

To be eligible for transfer the candidate must meet the following requirements:

1. His credits must satisfy the full entrance requirements of Amherst College, including the four-year Latin requirement. It may be necessary to use some of his advanced credits for this purpose.

2. He must have completed creditably the work of at least one year in an institution of collegiate rank, and his general average at the institution he is leaving must correspond to or be better than the Amherst diploma average of seventy per cent; and he must present a statement of honorable dismissal.

A candidate for transfer should write to the Secretary of the Faculty as early as possible, indicating in full the credits, both entrance and advance, that he intends to present, sending also a catalogue of the institution from which he wishes to transfer with the courses marked which he has taken and is taking; and he should also give the grades he has received to date in each college subject.

As soon as possible after the close of the college year he should send to the Secretary of the Faculty the official transcript of his record at the institution he is leaving, showing (a) his entrance credits, (b) his advance credits, and (c) an honorable dismissal. In order to be definitely enrolled as an applicant for transfer he should send at this time the regular registration fee of ten dollars, in the form of a check payable to "Trustees of Amherst College."

He will be credited for all work equivalent to courses in Amherst College, but such credit is regarded as provisional at the time of his admission, and will not be considered as final, nor will he be given final enrollment, until he has satisfactorily completed one year's work at Amherst.

Candidates for admission by transfer are admitted only at the beginning of the college year.

All correspondence concerning admission should be addressed to the Secretary of the Faculty.

ADMISSION SUBJECTS IN DETAIL

BIOLOGY

The course should consist of recitations and laboratory exercises occupying five hours a week through not less than a half year. It should cover a study of the structure and physiology of plants and animals, with special attention to the human body. In addition practical problems involving man's relation to his environment should receive consideration.

BOTANY

The candidate should complete a course of recitation and laboratory work of not less than five hours a week for one-half of a school year. The class work should cover the structure and important physiological processes of flowering plants.

CHEMISTRY

The topics for study should include:

Properties of the principal acid-forming elements and their compounds; simple problems on relations by weight; relations between gas-volumes and the weights of chemically related solids; acids, bases, and salts; formation of acids and bases from their salts; valence; series of oxy-acids and their salts; oxidation and reduction; acid anhydrides; hydrated and poly-acids.

ENGLISH

The requirement in English is that recommended by the National Conference on Uniform Entrance Requirements in English. The candidate may choose between two plans for preparation, the Restrictive and the Comprehensive.

REQUIREMENTS UNDER THE RESTRICTIVE PLAN

I. *Habits of correct, clear, truthful expression.* This part of the requirement calls for a carefully graded course in oral

and written composition, and for instruction in the practical essentials of grammar, a study which should be reviewed in the secondary school. In all written work constant attention should be paid to spelling, punctuation, and good usage in general as distinguished from current errors. In all oral work there should be constant insistence upon the elimination of such elementary errors as personal speech-defects, foreign accent, and obscure enunciation.

II. *Ability to read with intelligence and appreciation works of moderate difficulty; familiarity with a few masterpieces.* This part of the requirement calls for a carefully graded course in literature. Two lists of books are provided from which a specified number of units must be chosen for reading and study.¹ The first, designated as the A List, contains selections appropriate for the earlier years in the secondary school. These should be carefully read, in some cases studied, with a measure of thoroughness appropriate for immature minds. The second, designated as the B List, contains selections for the closer study warranted in the later years. The progressive course formed from the two lists should be supplemented by home reading on the part of the pupil and by classroom reading on the part of pupils and instructor. It should be kept constantly in mind that the main purpose is to cultivate a fondness for good literature and to encourage the habit of reading with discrimination.

REQUIREMENT UNDER THE COMPREHENSIVE PLAN

The requirement under the Comprehensive Plan is identical with the requirement under the Restrictive Plan except that no books are prescribed for reading and study, the selection of suitable works being left to the preparatory school.

¹ The lists referred to are given in the Announcements of the College Entrance Examination Board.

FRENCH

The requirements in French follow the recommendations of the Committee of Twelve of the Modern Language Association of America.

See page 71 for college courses which correspond to entrance French A, B.

A. ELEMENTARY FRENCH (Cp. 2)

During the first year the work should comprise: (1) careful drill in pronunciation; (2) the rudiments of grammar, including the inflection of the regular and the more common irregular verbs, the plural nouns, the inflection of adjectives, participles, and pronouns; the use of personal pronouns, common adverbs, prepositions, and conjunctions; the order of words in the sentence, and the elementary rules of syntax; (3) abundant easy exercises, designed not only to fix in the memory the forms and principles of grammar, but also to cultivate readiness in the reproduction of natural forms of expression; (4) the reading of from 100 to 175 duodecimo pages of graduated texts, with constant practice in translating into French easy variations of the sentences read (the teacher giving the English) and in reproducing from memory sentences previously read; (5) writing French from dictation.

Suitable texts for the first year are: A well graded reader for beginners; Bruno, *Le Tour de la France*; Compayré, *Yvan Gall*; Laboulaye, *Contes bleus*; Malot, *Sans Famille*.

During the second year the work should comprise: (1) the reading of from 250 to 400 pages of easy modern prose in the form of stories, plays, or historical or biographical sketches; (2) constant practice, as in the previous year, in translating into French easy variations upon the texts read; (3) frequent abstracts, sometimes oral and sometimes written, of portions of the text already read; (4) writing French

from dictation; (5) continued drill upon the rudiments of grammar, with constant application in the construction of sentences; (6) mastery of the forms and use of pronouns, pronominal adjectives, of all but the rare irregular verb forms, and of the simpler use of the conditional and subjunctive.

Suitable texts for the second year are: Daudet, *Le Petit Chose*; Erckmann-Chatrian, stories; Halévy, *L'Abbé Constantin*; Labiche et Martin, *Le Voyage de M. Perrichon*; Lavisse, *Histoire de France*.

B. INTERMEDIATE FRENCH

This should comprise the reading of from 400 to 600 pages of French of ordinary difficulty, a portion to be in the dramatic form; constant practice in giving French paraphrases, abstracts, or reproductions from memory of selected portions of the matter read; the study of a grammar of moderate completeness; writing from dictation.

Suitable texts for the third year are: Bazin, *Les Oberlé*; Dumas, novels; Mérimée, *Colomba*; Sandeau, *Mlle. de la Seiglière*; Tocqueville, *Voyage en Amérique*.

GERMAN

The admission requirements in German follow the recommendations of the Committee of Twelve of the Modern Language Association of America.

See page 75 for college courses which correspond to entrance German A, B.

A. ELEMENTARY GERMAN (Cp. 2)

During the first year the work should comprise: (1) careful drill upon pronunciation; (2) the memorizing and frequent repetition of easy colloquial sentences; (3) drill upon the rudiments of grammar, that is, upon the inflection of the articles, of such nouns as belong to the language of

everyday life, of adjectives, pronouns, weak verbs and the more usual strong verbs; also upon the use of the more common prepositions, the simpler uses of the modal auxiliaries, and the elementary rules of syntax and word-order; (4) abundant easy exercises designed not only to fix in mind the forms and principles of grammar, but also to cultivate readiness in the reproduction of natural forms of expression; (5) the reading of from 75 to 100 pages of graduated texts from a reader, with constant practice in translating into German easy variations upon sentences selected from the reading lesson (the teacher giving the English), and in the reproduction from memory of sentences previously read.

Suitable texts for the first year are: after one of the many readers especially prepared for beginners,—Meissner's *Aus meiner Welt*; Blüthgen's *Das Peterle von Nürnberg*; Storm's *Immensee*, or any of Baumbach's short stories.

During the second year the work should comprise: (1) the reading of from 150 to 200 pages of literature in the form of easy stories and plays; (2) accompanying practice, as before, in the translation into German of easy variations upon the matter read and also in the off-hand reproduction, sometimes orally and sometimes in writing, of the substance of short and easy selected passages; (3) continued drill upon the rudiments of the grammar, directed to the ends of enabling the pupil, first, to use his knowledge with facility in the formation of sentences, and, secondly, to state his knowledge correctly in the technical language of grammar.

Suitable texts for the second year are: Gerstäcker's *Germelshausen*; Eichendorff's *Aus dem Leben eines Taugenichts*; Wildenbruch's *Das edle Blut*; Jensen's *Die braune Erica*; Seidel's *Leberecht Hühnchen*; Fulda's *Unter vier Augen*; Benedix's *Lustspiele* (any one).

At least six German poems should be committed to memory each year.

B. INTERMEDIATE GERMAN

The work should comprise, in addition to the elementary course, the reading of about 400 pages of moderately difficult prose and poetry, with constant practice in giving, sometimes orally and sometimes in writing, paraphrases, abstracts, or reproductions from memory of selected portions of the matter read; also grammatical drill upon the less usual strong verbs, the use of articles, cases, auxiliaries of all kinds, tenses and moods (with special reference to the infinitive and subjunctive), and likewise upon word-order and word-formation.

Suitable texts for the third year are: Heyse's, Riehl's, Keller's, Storm's, Meyer's, Ebner-Eschenbach's, W. Raabe's *Novellen* or *Erzählungen*; Schiller's *Wilhelm Tell*; Freytag's *Die Journalisten*; Heine's *Harzreise*.

At least six German poems should be committed to memory.

GREEK**A, B. ELEMENTARY GREEK (Cp. 2)**

Greek Grammar and Composition.

Xenophon's *Anabasis*.

H. ADVANCED GREEK

Homer's *Iliad*, and the Homeric forms, constructions, idioms and prosody.

HISTORY

The requirements are those adopted by the College Entrance Examination Board, April 21, 1923.

A. ANCIENT HISTORY

The course should devote one-half of the year to the study of the ancient Orient and Greece as far as the death of Alexander and the break-up of his empire, with the expansion of

Greek culture in the Mediterranean World. The second half-year should be devoted to the study of the history of Rome to the year 476 A.D.

Since not more than one-tenth of the whole time available can be allotted to the study of the history of the Orient, only so much of its narrative history should be studied as will hold the story together and fix its geography and its time relations. Emphasis should be laid, not upon the details of military and political history, but upon the civilization developed by the different peoples of the Orient, with particular reference to the contributions which they made to later ages.

In the study of Greek history, little time should be spent on the period prior to the Persian Wars, except to deal concretely with Homeric society and to emphasize the expansion of Hellas. From the Persian Wars to the death of Alexander the study should be exact and thorough, with special reference to the political, intellectual, and artistic development of Hellas during the Age of Pericles. Instead of trying to trace the constitutional development of Athens and Sparta from the beginning, the operation of the government in these states at the time of their maturity should be mastered.

In the period following the death of Alexander no attempt should be made to follow the intricate political history of the time, but opportunity should be found to study the federal government of Greece and the philosophy, literature, art, and religious cults which were the factors of the mixed Græco-Oriental culture of which Rome became the heir.

At the beginning of the second half-year the history of Rome to about the year 300 B.C. should be covered very rapidly. The attempt should be made rather to understand the organization and working of Senatorial government

in the third and second centuries B.C. than to trace the changes made in Roman institutions in the fifth and fourth centuries. From 300 B.C. to the death of Marcus Aurelius the study must be relatively detailed and thorough.

B. EUROPEAN HISTORY

The C. E. E. B. examination in this subject is designed both for the students who have prepared in Medieval and Modern European history and for those who have prepared in Modern European history only.

Students who are offering Medieval and Modern European history will not be held to so detailed a knowledge of the nineteenth century as those offering only Modern European history. They should emphasize the contributions of the Roman Empire, the Germans, and the Christian Church to medieval civilization. The structure of feudal society, the Crusades, the formation of the European states, the several phases of the Renaissance and of the Reformation, and the discoveries outside of Europe should be covered.

Students who are offering Modern European history should emphasize the absolute monarchy of Louis XIV, colonial expansion and rivalries, the development of the constitutional monarchy in England, the enlightened despotism of Frederick the Great, the republican government of Revolutionary France, the Napoleonic epoch, and the main facts in the political development of Europe since 1815. Special emphasis should be laid upon the Industrial Revolution—its political and social aspects—upon the growth of nationalism and democracy, and upon the economic expansion of the European possessions outside of Europe. The study of the last half-century should include some account of the great material changes, important inventions, and intellectual and social and humanitarian movements.

C. ENGLISH HISTORY

The division of the work between the two half-years should be made at about 1660.

During the first half-year, the periods of the Tudors and the early Stuarts should receive emphasis. Only the briefest reference to the period before 1066 need be made, and from the Norman Conquest to the accession of the Tudors the treatment should be topical rather than exhaustive. It should deal with the effects of the Norman Conquest, relations with France, Scotland, and Ireland, Magna Carta and the origins of Parliament, and the emergence of parliamentary government out of the feudal monarchy. Some attempt also should be made to explain the development and character of the Christian Church in England, its relations with the papacy, the severance of these relations, the establishment of the national church, and the Puritan movement.

In the second half-year, starting with the Restoration, attention should be given first to the continued struggle between Crown and Parliament, culminating in the establishment of responsible government. In studying the great wars with France, attention should be directed to the commercial and colonial expansion in America and the East. With regard to imperial policy, the causes and effects of the Scottish and Irish unions and the revolt of the American colonies should be explained. The study of the revolution in agriculture, industry, and transportation should include some consideration of the consequent political and social reforms. Since the Reform Act of 1867, emphasis should be laid upon the more important reforms affecting economic, political, and social life, and upon the problem of Ireland. Some idea should be given of the growth and nature of the British power in the Colonies and the problem of imperial organization.

In general, it is desirable to emphasize the important epochs and movements rather than the reigns of the monarchs; to trace developments; to secure a clear comprehension of the more influential personalities; and to show the relations of English history to the history of other countries, especially the United States.

D. AMERICAN HISTORY, WITH OR WITHOUT CIVIL GOVERNMENT

Candidates who wish to offer American History and Civil Government should devote at least one-fourth of their time to civil government. This study should be closely co-ordinated with American history at every point of contact. The period of American history prior to 1763 may be treated briefly as a background for subsequent epochs. The period since the Civil War should receive adequate attention (about as much time as the period between 1763 and 1865). Questions on current events will not be asked.

The study of civil government should include a careful analysis of the Constitution of the United States—the powers, organization, and functions of the federal government, the relations between the states and the federal government, and the general nature and extent of the powers reserved to the states.

For the guidance of both the teacher and the student, the following suggestions are made:

1. That careful attention should be paid to map studies.
2. That the topics of slavery and secession should not be emphasized at the expense of the study of territorial expansion and social and industrial growth.
3. That due attention should be paid to the policy of the United States in foreign affairs, tariff, banking, civil service, currency, trusts, conservation of natural resources, capital and labor, immigration, and other present day problems.

4. That familiarity with the lives and public services of great Americans should be especially encouraged.

LATIN

Amherst College estimates its Latin requirement as equivalent to four years of study in Latin, which will include four books of Cæsar, six orations of Cicero and six books of Vergil's *Aeneid*. The College accepts, however, satisfactory preparation along the lines described in the statement of the College Entrance Examination Board, which is as follows:

In 1929 and thereafter there will be no prescribed readings in Latin.

The following recommendations are made in respect to the reading:

(1) In the second year the early reading should be easy Latin which may be "made" or adapted Latin; not less than one semester of this year should be devoted to the reading of selections from Cæsar. The reading for the year may also include easy selections from such authors as Aulus Gellius, Eutropius, Nepos, Phaedrus, Quintus Curtius Rufus, and Valerius Maximus, or books of selections containing some of these together with other authors of prose works.

(2) In the third year, if the reading be in prose, not less than one semester should be devoted to the reading of selections from Cicero; the reading for the year may also include selections from such authors as Pliny, Sallust, and Livy, or books of selections containing these and other authors of prose works.

(3) In the fourth year, if the reading be in poetry, not less than one semester should be devoted to the reading of selections from Vergil; and the reading for the year may also include selections from such works as the *Metamorphoses*, *Tristia*, *Heroides*, and *Fasti* of Ovid, or books of selec-

tions containing poems or extracts from Ovid or from other poets.

MATHEMATICS

The present definition of the requirements in Mathematics is in accordance with recommendations made in 1918 by a committee of the Mathematical Association of America.

ELEMENTARY MATHEMATICS

A. Algebra to quadratics and beyond.

A1. Algebra to quadratics.

The meaning, use, evaluation, and necessary transformations of simple formulas involving ideas with which the pupil is familiar, and the derivation of such formulas from rules expressed in words; the graph, and graphical representation in general; the construction and interpretation of graphs; negative numbers; their meaning and use; linear equations in one unknown quantity, and simultaneous linear equations involving two unknown quantities, with verification of results; problems; ratio, as a case of simple fractions; proportion, as a case of an equation between two ratios; variation; problems; the essentials of algebraic technique; exponents and radicals; simple cases; numerical trigonometry.

A2. Quadratics and beyond.

Numerical and literal quadratic equations in one unknown quantity; problems; the binomial theorem for positive integral exponents, with applications; arithmetic and geometric series; simultaneous linear equations in three unknown quantities; simultaneous equations, consisting of one quadratic and one linear equation, or of two quadratic equations of certain types; graphs; exponents and radicals; logarithms.

C. Plane geometry.

The usual theorems and constructions of good text-books, including the general properties of plane rectilinear figures; the circle and the measurement of angles; similar polygons; areas; regular polygons and the measurement of the circle; the solution of numerous original exercises, including loci problems; applications to the mensuration of lines and plane surfaces.

ADVANCED MATHEMATICS**B. Advanced algebra.**

Theory of equations; determinants; complex numbers (numerical and geometric treatment), simultaneous quadratics, scales of notation, mathematical induction, permutations and combinations, and probability.

D. Solid geometry.

The usual theorems and constructions found in good text-books, including the relations of planes and lines in space; the properties and measurement of prisms, pyramids, cylinders, and cones; the sphere and the spherical triangle; the solution of numerous original exercises, including loci problems; applications to the mensuration of surfaces and solids.

E. Plane trigonometry.

Definition of the six trigonometric functions of angles of any magnitude, as ratios; the computation of five of these ratios from any given one; functions of 0° , 30° , 45° , 60° , 90° , and of angles differing from these by multiples of 90° ; determination, by means of a diagram, of such functions as sine ($A+90^\circ$) in terms of the trigonometric functions of A ; circular measure of angles; length of an arc in terms of the central angle in radians; proofs of the fundamental formulas, and of simple identities derived from them; solution of simple trigonometric equations; theory and use of logarithms, without the introduction of work involving infinite series;

use of trigonometric tables, with interpolation; derivation of the Law of Sines and the Law of Cosines; solution of right and oblique triangles (both with and without logarithms) with special reference to the applications.

MUSIC (Harmony)

The candidate should acquire: (1) the ability to harmonize in four vocal parts simple melodies of not fewer than eight measures, in soprano or in bass. The harmonization of such melodies requires a knowledge of triads and inversions, of diatonic seventh chords and their inversions, in major and minor modes, and of modulation, transient or complete, to nearly related keys; (2) a knowledge of analysis of ninth chords, of all non-harmonic tones, and of altered chords.

Systematic ear-training (as to interval, melody, and chord) is urgently recommended as part of the preparation for this examination. A full knowledge of the rudiments of music, scales, intervals, and staff notation, is expected.

PHYSICS

Candidates should pursue a course extending through one year, involving both class exercises and laboratory work. The class work should include careful study of the whole subject as presented in some good text-book of high school grade.

PHYSIOGRAPHY

Candidates should master Dyrer's *Physical Geography* or Davis' *Elementary Physical Geography*, with laboratory work and excursions for observations of land features.

PHYSIOLOGY

Candidates should complete a course of recitation and laboratory work of not less than forty hours, including the

study of the structure of the principal organs of the human body, with special attention to their working. The emphasis should be placed on function. An elementary knowledge of personal hygiene as the practical application of this science is required.

SPANISH

The requirement in Spanish A is based upon the recommendations of a committee of the Modern Language Association. See pages 93 and 94 for college courses which correspond to entrance Spanish A, B.

A. ELEMENTARY SPANISH (Cp. 2)

During the first year the work should comprise: (1) careful drill in pronunciation; (2) the rudiments of grammar, including the inflection of the regular and the more common irregular verbs, the inflection of nouns, adjectives, and pronouns, and the elementary rules of syntax; (3) abundant easy exercises, designed not only to fix in the memory the forms and principles of grammar, but also to cultivate readiness in the reproduction of natural forms of expression; (4) the reading of about 100 pages of graduated texts, with constant practice in translating into Spanish easy variations of the sentences read (the teacher giving the English), and in reproducing from memory sentences previously read; (5) writing Spanish from dictation; (6) memorizing of Spanish passages of conversational prose and of simple verse.

Suitable texts for the first year are: a carefully graded reader for beginners: Juan Valera, *El pájaro verde*; Pérez Escrich, *Fortuna*; Altamirano, *La Navidad en las montañas*.

During the second year the work should comprise: (1) the reading of about 200 pages of easy modern prose in the form of stories, plays, or historical or biographical sketches; (2) constant practice, as in the previous year, in translating

into Spanish easy variations upon the texts read; (3) frequent abstracts, sometimes oral and sometimes written, of portions of the text already read; (4) continued study of the elements of grammar and syntax and the use of a composition book; (5) mastery of all but the rare irregular verb forms and of the simpler uses of the modes and tenses; (6) writing Spanish from dictation; (7) memorizing of Spanish passages of conversational prose and of simple verse.

Suitable texts for the second year are: a collection of short stories by different authors; a collection of brief comedies; a collection of easy lyrics (Spanish and Spanish-American) or of verse fables; a Spanish or Spanish-American historical reader; Alarcón, *El Capitán Veneno*; Carrión and Aza, *Zaragüeta*; Frontaura, *Las tiendas*; Quintana, *Vasco Núñez de Balboa*; Jorge Isaacs, *María*; Palacio Valdés, *José*; Márromol, *Amalia*.

B. INTERMEDIATE SPANISH

The work should comprise the reading of from 300 to 400 pages of Spanish of ordinary difficulty; constant practice in giving Spanish paraphrases, abstracts, or reproductions from memory of selected portions of the matter read; the discussion in Spanish of the main facts of Spanish and Spanish-American geography, history, and customs, for the study of which the teacher will provide the material; the study of a grammar of moderate completeness; the use of a composition book; writing from dictation.

Suitable texts for the third year are: Taboada, *Cuentos alegres*; Isla's version of the *Gil Blas*; Selgas, *La mariposa blanca*; Pérez Baldós, *Doña Perfecta*; Palacio Valdés, *La Hermana San Sulpicio*; a collection of essays dealing with Spanish or Spanish-American life and customs; Moratín, *El sí de las niñas*; Larra, *Partir a tiempo*; plays of the Alvarez Quintero brothers; plays of Benavente.

ZOOLOGY

The requirement in Zoölogy was framed by a representative commission, the appointment of which was authorized by the College Entrance Examination Board in April 1914.

The course should be developed on the basis of laboratory study guided by definite directions. This should be supplemented by the careful study of at least one modern elementary text-book. At least one-half of the time should be devoted to the practical studies of the laboratory. Pupils should be encouraged to do supplementary work in the line of natural history, *especially* if good nature studies have not preceded the high school course. A note-book with carefully labeled outline drawings of the chief structures studied anatomically, with notes on demonstrations, and in explanation of drawings, with descriptions of experiments, with dates and with index, should be prepared by the pupil in connection with practical work.

CURRICULUM
GENERAL REQUIREMENTS
DEGREE OF BACHELOR OF ARTS

The degree of Bachelor of Arts is awarded to candidates who complete twenty year courses which include one year of mathematics; one year of English; one year (two years if elementary) of Greek or one¹ year of Latin; two years of science in the group astronomy, biology, chemistry, geology, physics; one year in the group English, foreign language, music; one year of history or philosophy; two majors; and in addition to the twenty courses certain work in the group Biblical literature I, public speaking, public reading, chorus or orchestra, and in physical education.

In order to receive a degree a candidate must have no deficiencies in the work of any year, must have a reading knowledge of German or a Romance language (French, Italian, or Spanish), and must attain an average grade of seventy per cent for his entire course.

Courses of study are by years. A course of less than a year in any subject may be counted toward a degree only if approved in advance by the Administration Committee.

All courses are assigned three hours each week except (1) the year of required mathematics, the first year of Greek for beginners, the elementary course in Vergil, and the regular Freshman courses in Greek and Latin, which are four-hour courses for half the year; and (2) the year of required English which is a two-hour course.

Every candidate for a degree completes two majors during his college course.

¹ Two years if the candidate offers only the minimum requirement in ancient language.

A major consists of three year courses in the same subject pursued either (1) during three consecutive years, or (2) during the Junior and Senior years. A major must be completed in the Senior year, and, therefore, it may not be begun until after the Freshman year.

Each student takes five courses in each year, no student taking more than six courses. (This does not apply to Biblical literature I, public speaking, public reading, chorus or orchestra.)

Not more than two courses taken simultaneously in one subject or under one instructor count towards a degree.

A student may elect more than four year courses in any subject only if permitted to do so by the department and the Administration Committee.

Credits for subjects previously taken may not be used to reduce the number of courses required in any year nor as substitutes for delinquencies subsequently incurred.

No student is allowed to remain in college more than one year with an entrance delinquency.

Early in his college course the student should note the prerequisites of the various departments in order that he may not be prevented from making the elections which he desires.

HONORS IN A SPECIAL SUBJECT

Honors in a single department of study are awarded for special work involving collateral reading or investigation under special conditions. (See page 105.) A successful candidate is recommended to the faculty for honors, high honors, or highest honors. A student who receives honors has one half unit added to his total average rank; high honors, one unit; highest honors, two units. Honors are announced in the annual catalogue.

GRADUATION IN THREE YEARS

A student who has at entrance, by examination, credit for two year courses may take six courses each year in addition to the required work in the group Biblical literature 1, public speaking, public reading, chorus or orchestra, and in physical education, and may thus obtain a degree in three years. Written notice of intention to complete the course in three years must be given to the Secretary of the Faculty at the beginning of the first year.

STUDIES OF FRESHMAN YEAR

1. Ancient language ^a
2. Mathematics
3. English
4. 5. Two subjects from the following groups, but not more than one subject from any one group:
 - A. Foreign language ^b
 - B. History
 - C. Chemistry, physics
6. Biblical literature 1, public speaking, public reading, chorus or orchestra ^c
7. Physical education

^a If the subject chosen is Greek 1 the student elects Greek 2 in his Sophomore year. In other cases only one year of ancient language is required of those who have presented for admission either four years of Latin or three years of Greek.

^b Especial attention is called to the fact that the reading-knowledge examination in a modern foreign language may be taken in the fall of the Freshman year by those students only who present for admission three points in a modern foreign language. Such an examination may be taken in the spring of the Freshman year by those who present but two points of a modern foreign language provided that language has been continued during the Freshman year.

^c One subject must be, and not more than two may be, elected from this group. These courses run through the year and require attendance and study approximately equal in amount to one-third that of a regular three-hour course.

STUDIES OF SOPHOMORE YEAR

At least one subject must be chosen from each of the groups 1, 2, 3.

1. English, foreign language^d, music
2. Biology, chemistry, geology, mathematics, physics
3. History, philosophy
4. Elective
5. Elective
6. Biblical literature 1, public speaking, public reading, chorus or orchestra^e
7. Physical education

STUDIES OF JUNIOR YEAR

1. Major 1
2. Major 2

DEGREE OF MASTER OF ARTS

Every candidate for the Degree of Master of Arts shall make application to the Dean of the College for permission to enter upon a course of study for the degree. (See page 27.) This application should be made as early as possible, in any case not later than one week before the first day of the college year. A blank form of application may be obtained from the Dean of the College. This application should be accompanied by the official transcript of the applicant's

^d If the reading requirement of a modern language has not been satisfied during Freshman year a modern language must be elected in Sophomore year.

record at the institution where he has received his Bachelor's degree, showing in detail the entrance subjects, the college courses and the grades received in the work for the degree.

Each candidate, as soon as his application is approved by the Dean, should discuss his plans in person or by letter with some member of the department in which he proposes to do his major work. His plan of work when approved by the professor in charge shall then be reported to the Dean for final approval by the Administration Committee.

In pursuing a course of instruction in Amherst College for the degree of Master of Arts it is desired that the candidate shall catch the spirit and purpose of creative scholarship. To this end an essential requirement for the degree of Master of Arts is the presentation of a thesis that shall indicate ability to do work on one's own initiative.

In addition to the above and as a preparation for further graduate work the candidate while in residence shall complete with a grade of at least eighty per cent certain advanced courses which have a unity in subject and purpose. The usual plan of work consists of four related advanced courses, of which one shall involve investigation or creative work: but a special plan involving more of such independent work, if approved by the professor under whose direction the candidate will be working, may be approved by the Committee on Administration. Candidates may register for elementary courses, but no credit will be given for them toward the degree.

The thesis is a report of the research done by the candidate, typewritten in form for publication. Three copies shall be submitted to the professor in charge of the candidate's work one week before the regular examination period in June, one of which shall be deposited in the college library. The thesis must be accepted and approved by the professor

in charge before the candidate is admitted to the examination for the Master's degree.

This examination is oral and is held during the week immediately preceding the regular final examination period in June, the exact date to be arranged by conference between the candidate and the professor under whom his work is being done. The examination covers the work of the thesis or questions bearing on it in related fields. It is open to all members of the faculty, who may question the candidate as they desire. Examiners may inform themselves as to the material covered, by reading the thesis in advance. At the conclusion of the examination the examiners present constitute a committee to certify to the Dean whether the candidate has met this portion of the requirements for the degree.

Candidates must spend one year in residence at Amherst and appear in person at the conferring of the degree.

Communications relative to the degree should be addressed to the Dean of the College.

COURSES OF INSTRUCTION IN DETAIL

Each of the following courses extends throughout the year unless otherwise stated.

A tabulated statement of electives by years will be found on page 95.

Unless the contrary is stated, members of any class are permitted to elect courses which are open to the members of a lower class.

ASTRONOMY

I. Introduction to astronomy.

Elective for Sophomores.

Tu., Thu., Sat., 7:50, Geology Laboratory.

PROFESSOR GREEN.

2. Practical astronomy and navigation.

Elective for Juniors.

Astronomy 1 requisite.

Three hours per week with the understanding that two hours of observatory work may be substituted at any time for one hour of class-room work.

This course is given in alternate years with Physics 4.

Tu., Thu., 8:50, Appleton 21, Tu., 2:00, Observatory.

PROFESSOR GREEN.

5. Special problems in astronomy. Individual work at the Observatory on assigned problems. Reports and discussions at frequent intervals.

Elective for Seniors.

Astronomy 1, Mathematics 2 and either Astronomy 2 or Physics 4 requisite.

Thu., 2:00, Observatory.

PROFESSOR GREEN.

NOTE.—Physics 4 is offered in the years in which Astronomy 2 is omitted, and may be counted as a course in astronomy.

In order that a student may present a major in astronomy or be a candidate for final honors in astronomy it will be necessary for him to elect Astronomy 1 in his Sophomore year.

BIBLICAL LITERATURE

1. The modern view of the Bible. A study of the historical background and the major ideas of the more important portions of the Bible, as understood by modern scholars.

Elective for Freshmen.

One lecture and extensive outside reading each week.

Wed., 12:10, Williston 1.

PROFESSOR GILKEY.

2. The development of modern Christianity. A study of the development of the ethical and religious ideas under-

lying Christianity, a review of the leading non-Christian religions and the history of the Christian Church, and a discussion of the beliefs and the problems of the Christianity of today.

Elective for Juniors.

Biblical Literature 1 requisite.

Two lectures and extensive outside reading each week.

Tu., Wed., 11:10, Williston 1.

PROFESSOR GILKEY.

3. The facts about Jesus. A detailed and technical study of all the material in the Synoptic Gospels, aiming to determine the actual events of Jesus' life and the original meaning of His teachings.

Elective for Seniors.

A grade of B in either of the preceding courses requisite.

Two hours of discussion and extensive outside study and reading each week.

Wed., 2:00, Library.

PROFESSOR GILKEY.

BIOLOGY

NOTE.—Students intending to enter a medical school should elect courses 1 and 4.

1. General biology. An introduction, especially arranged to serve as part of a program of liberal study.

Elective for Sophomores.

Chemistry 1 or Physics 1 recommended.

Three hours class-room and two hours laboratory work per week.

Tu., Thu., Sat., 12:10, Appleton 31.

PROFESSORS PLOUGH and GLASER and DR. FRIEDMANN.

Fee, \$6.00.

3. General structure, physiology and taxonomy of the flowering plants.

Oct 1914

Elective for Sophomores.

Three hours class-room and two hours laboratory work per week until the spring recess, after which field work will be substituted for the laboratory work and a part of the recitation appointments.
Mon., Wed., Fri., 12:10, Appleton 20.

PROFESSOR GOODALE.

Fee, \$10.00.

4. Embryology and comparative anatomy of vertebrates.*Elective for Juniors.*

Biology 1 requisite. Election limited to twenty students.

Three hours class-room and three hours laboratory work per week.
Tu., Thu., Sat., 9:50, Biology Laboratory.

PROFESSORS GLASER and PLOUGH.

Fee, \$10.00.

5. Natural history, ecology, and taxonomy of vertebrates. A study of the relations of animals to each other, and to their environment. The life histories, distribution, behavior, and classification of vertebrates will be studied in the field and in the laboratory, stress being laid on the local fauna, with which students will be expected to become familiar. Field work will be required in early fall and in the spring, and laboratory work during the winter.*Elective for Juniors.*

A grade of B in Biology 1 requisite.

Mon., Wed., 7:50, Biology Laboratory; Tu., 2:00 Morgan Library.

DR. FRIEDMANN.

Fee, \$5.00.

6. Evolution of the plant kingdom.*Elective for Juniors.*

Biology 1 or 3, requisite.

Three hours class-room and two hours laboratory work per week.
Mon., Wed., Fri., 7:50, Appleton 20.

PROFESSOR GOODALE.

Fee, \$10.00.

7. Genetics. A study of the facts and principles of heredity and of its physical basis.

First semester course. (Second semester course may be Biology 8 or 9.)

Elective for Seniors.

A grade of B in a preceding course in Biology requisite.

Mon., Wed., 2:00, Biology Laboratory.

PROFESSOR PLOUGH.

Fee for the year, \$2.50.

8. History of biological thought.

Second semester course. (First semester course may be Biology 7 or 9.)

Elective for Seniors.

A grade of B in a preceding course in Biology requisite.

PROFESSOR GLASER.

9. Problems in biology. Individual work in the laboratory or field on assigned problems. Reports and discussions at intervals.

Elective with the consent of the instructors for Seniors and Graduate Students.

Three courses in biology or the equivalent requisite; in 1928-1929 one of these three courses may be taken concurrently.

PROFESSORS GLASER and PLOUGH and DR. FRIEDMANN.

10. Plant distribution and ecology. A study of the effect of environment upon plants and the vegetation types. Geographical distribution. During the latter part of the year special attention will be given to the vegetation types occurring in the local flora.

Elective for Juniors.

A grade of B in Biology 3 requisite.

Tu., 2:30, Appleton 21.

PROFESSOR GOODALE.

NOTE.—See also Geology 4 which may be counted as a course in biology instead of geology.

CHEMISTRY

NOTE.—Students preparing for medical school should take both Chemistry 2 and Chemistry 4.

1. General chemistry.

Elective for Freshmen.

Three hours class-room and two hours laboratory work per week.

Mon., Wed., Fri., 9:50, Chemistry Laboratory.

PROFESSORS HOPKINS and BEEBE, and MR. ADAMS.

Fee, \$10.00.

2. Inorganic chemistry. Class work; introduction to theoretical chemistry with especial emphasis on the kinetic theory, theory of solutions, and applications of chemical equilibrium.

Laboratory work; inorganic preparations (first term); qualitative analysis (second and third terms).

Elective for Sophomores.

Chemistry 1 requisite.

Three hours class-room and three hours laboratory work per week.

Tu., Thu., Sat., 8:50, Chemistry Laboratory.

PROFESSOR DOUGHTY and MR. ADAMS.

Fee, \$20.00.

3. Quantitative chemistry. Laboratory work in gravimetric, volumetric and electrometric methods of analysis, including determination of hydrogen ion concentration. Conferences and assigned reading.

Elective for Juniors.

Chemistry 1, 2 requisite.

One hour class-room and seven hours laboratory work per week.

Mon., Wed., 2:00, Chemistry Laboratory.

PROFESSOR BEEBE.

Fee, \$20.00.

4. **Organic chemistry**; an introduction to the chemistry of the compounds of carbon. General theory of organic chemistry and preparation of typical compounds.

Elective for Sophomores.

Chemistry 1 requisite.

A Sophomore may not take both Chemistry 2 and Chemistry 4. Three hours class-room and three hours laboratory work per week.

Tu., Wed., Sat., 11:10, Chemistry Laboratory.

PROFESSOR DOUGHTY and MR. ADAMS.

Fee, \$20.00.

ECONOMICS

1. **The methods and materials of economics; an introduction to economics.** The development and organization of economic life, the methods of analyzing economic problems, and the means of social control.

This course is intended exclusively for those planning to pursue advanced study in the department.

Elective for Sophomores.

Prerequisite for all other courses in economics, except Economics 2.

A. Mon., Wed., Fri., 8:50, Chapel 4.

PROFESSOR TAYLOR.

B. Mon., Wed., Fri., 9:50, Williston 1.

PROFESSOR THORP.

C. Mon., Wed., Fri., 11:10, Chapel 4.

D. Mon., Wed., Fri., 12:10, Chapel 4.

MR. TOWLE.

2. Survey of economics. An analysis of the existing economic order and the problems it presents; value and price, money and banking, international trade, the distribution of wealth, labor problems, railroads, industrial combinations, socialism, and taxation.

This course is planned for students who take but one course in economics.

Elective for Seniors.

Not open to students who have taken any other course in economics.

Mon., Wed., Fri., 9:50, Chapel 5.

PROFESSOR MERIAM.

3. Economic history of the United States. A study of the economic development of the United States down to the present time, with some attention to European influence and contemporary conditions.

Elective for Juniors.

Economics 1; and in addition a grade of B in Economics 1, or B in a history course, or a general average of B, requisite.

A. Mon., Wed., 9:50, Chapel 4; Fri., 8:50, Chapel 3.

B. Mon., Wed., 9:50, Chapel 4; Fri., 9:50, Chapel 3.

C. Mon., Wed., 9:50, Chapel 4; Fri., 2:00, Chapel 3.

PROFESSOR TAYLOR.

4. Labor problems. The economic and social relations of the wage-earners with the employers and the public; trade unionism, employment management, labor legislation, social insurance, co-operation, and political action.

Elective for Juniors.

DR. KENNEDY.

4. Psychology. The first part of the course gives a survey of the subject viewed as primarily an account of conscious processes, according to introspectionist theory. This is followed by a presentation of the opposed theory which considers psychology a study of behavior. Some of the

important facts and problems in abnormal psychology are then discussed. Finally an opportunity is given for each student to work for some weeks on a preferred topic, such as intelligence tests, advertising, psychical research, religious experience, etc.

Elective for Sophomores.

- A. Tu., Thu., Fri., 8:50, Walker 10.
- B. Tu., Thu., Sat., 8:50, Walker 10.
- C. Tu., Thu., 8:50, Sat., 9:50, Walker 10.

PROFESSOR TOLL.

5. (*Omitted 1928-1929*) **Special topics in psychology.** Each student will do individual work on a special topic chosen with the approval of the instructor.

Elective for Juniors.

A grade of B in Philosophy 4, or a college average of B, requisite.

PROFESSOR TOLL.

7. **Social and political ideals.** A study of certain basic principles in social life and organization; the philosophy of the State; liberty and sovereignty; ethics in social and political problems; the nature and function of art, religion and philosophy in their mutual relations.

Elective for Seniors.

Tu., Wed., Sat., 11:10, Walker 10.

PROFESSORS NEWLIN and LAMPRECHT.

8. (*Omitted 1928-1929*) **Contemporary philosophy.** A study of the work of several men who are influencing philosophical thought at present. Each student will have the opportunity to develop an independent program for at least a part of the work. The course may include some study of the theory of relativity and its influence on philosophy.

Elective for Seniors.

A grade of B in each of two philosophy courses requisite, except for men who have taken only one philosophy course. In their case a college average of B will satisfy the second part of the requirement.

PROFESSOR TOLL.

9. Metaphysics. A study of the fundamental assumptions of the view of the world built up under the influence of modern science; the rise of conflicting philosophical points of view and an analysis of their difficulties and merits.

Elective for Seniors.

Philosophy 2 requisite.

Thu., 2:00, Library.

PROFESSOR LAMPRECHT.

10. (Omitted 1928-1929) American philosophy. A study of the development of American philosophy since 1860, with especial attention to the work of Royce, James and Santayana. Individual investigations and reports will be required.

Elective for Seniors.

A grade of B in Philosophy 2 requisite.

DR. KENNEDY.

PHYSICS

1. General physics: mechanics, heat, magnetism, electricity, sound, and light. It is the aim of this course to lay a good foundation for further study in both pure and applied physics. It is desired that out of the year's work may come a better understanding of the scientific method and spirit of modern physics. While the analytical method of presentation is stressed at times, fundamental phenomena and principles, rather than rigid theoretical derivations, are emphasized throughout the course.

Elective for Freshmen.

Students who have not studied plane trigonometry will be admitted to the course only by special permission of the instructor.

Three hours class-room and two hours laboratory work per week.

Mon., Wed., Fri., 8:50, Physics Laboratory.

PROFESSOR STIFLER.

Fee, \$9.00.

The following courses are open to students who are credited with Physics I.

Students planning to take advanced courses or major in Physics should consult with members of the department staff regarding mathematical preparation.

2. **Mechanics**, stressing simple harmonic motion and Fourier's series; kinetic theory of matter; moduli of elasticity and other phases of classical mechanics.

Heat and elementary thermodynamics; sound.

The electron theory of matter.

Elective for Sophomores.

Three hours class-room and two hours laboratory work per week.

Mon., Thu., Fri., 11:10, Physics Laboratory.

MR. SOLLER.

Fee, \$10.00.

3. **Electricity and magnetism.** Emphasis upon the theory and practice of electrical and magnetic measurements.

Elective for Sophomores.

Physics I requisite.

Three hours class-room and two hours laboratory work per week.

Tu., Thu., 12:10, Fri., 2:00, Physics Laboratory.

MR. SOLLER.

Fee, \$10.00.

4. *(Omitted 1928-1929)* **Physical optics, optical instruments and astrophysics.**

Elective for Sophomores.

Physics 1, Mathematics 2 (which may be taken concurrently) requisite.

Three hours of class-room and two hours laboratory work per week. This course is offered in alternate years with Astronomy 2, and may be counted as a course in astronomy.

PROFESSORS WILLIAMS and GREEN.

Fee, \$10.00.

5. (*Omitted 1928-1929*) **Theoretical physics.** A fairly rigid mathematical treatment of certain classical problems in mechanics is followed by a discussion of analogous problems in sound, light, and electricity. In the latter part of the course these results are applied to some of the problems of modern physics, such as the theories of atomic structure.

Elective for Juniors.

Physics 1 and 2 or 3 and Mathematics 2, requisite.

Three hours of class-room work per week.

PROFESSOR STIFLER.

6. **Experimental physics.** Primarily a laboratory course preparatory to graduate study. Students registered for it will be assigned special problems, with individual instruction. Certain hours of the laboratory periods will be taken for discussion of the work.

Elective for Juniors.

Physics 1 and 2 or 3, and Mathematics 2, requisite.

Six hours laboratory work per week.

PROFESSOR STIFLER.

POLITICAL SCIENCE

1. (*Omitted 1928-1929*) **Modern governments.** The course will trace briefly the evolution of the modern national state, and describe the structure and functioning of con-

temporary governments, with special emphasis on England, France, Germany, Russia, and the United States.

Elective for Juniors.

PROFESSOR BRADLEY.

2. American government, national, state and local. A survey of national and local politics, with particular emphasis on the problems and functions of state and local government. The distribution of functions between the national and local governments, the agencies and powers of the various units, and their activities will be studied as far as possible from actual situations.

Elective for Juniors.

A. Mon., Wed., Fri., 7:50, Walker 12.
B. Mon., Wed., Fri., 9:50, Appleton 15.

PROFESSOR ZINK.

3. (Omitted 1928-1929) International relations and organization. The major problems of international relations in their racial, economic, and political aspects. Particular attention will be paid to the development of international organization during the nineteenth and twentieth centuries—the League of Nations, the World Court, the Locarno Treaties, the Pan American Union, etc.

Elective for Seniors.

PROFESSOR BRADLEY.

4. Constitutional and international law in the United States. “The nature of the judicial process” as exemplified by decisions of the Supreme Court. About one half year each will be devoted to the development of international and of constitutional law by the case method, and from the more important documentary material.

Elective for Seniors.

Mon., Wed., Fri., 8:50, Walker 12.

PROFESSOR ZINK.

NOTE.—Courses 1 and 3 will be offered in alternate years with 2 and 4.

PUBLIC READING

1. **Principles of voice production.** Participation in works of important dramatists. A study of problems and tendencies in the theatre.

Elective for Freshmen.

MR. CANFIELD.

2. **Advanced interpretation.**

Elective for Sophomores.

A grade of at least B in Public Reading 1 requisite.

MR. CANFIELD.

PUBLIC SPEAKING

1. **Fundamentals of oral expression.** A consideration of the principles of correctness, clearness, and effectiveness in speaking, with practice in the delivery of short original speeches.

Elective for Freshmen.

PROFESSOR GARRISON.

2. **Extemporaneous speaking; informal public address.**

Elective for Sophomores.

One course in public speaking or public reading requisite.

PROFESSOR GARRISON.

NOTE.—See also English 4 which may be counted as a course in public speaking instead of English.

SPANISH

1. **Pronunciation, grammar, composition, translation, conversation.** *Equivalent to entrance Spanish A.*

Elective for Sophomores.

Tu., Thu., Sat., 9:50, Barrett 6.

PROFESSOR BAXTER.

2. **Composition.** Advanced reading in the modern novel and some plays of the sixteenth and seventeenth centuries: *Lope de Vega*; *Calderón*. *Equivalent to entrance Spanish B.*

Elective for Sophomores and for Freshmen who have credit for Entrance Spanish A.

Mon., Thu., Fri., 11:10, Barrett 6.

PROFESSOR BAXTER.

LECTURESHIPS

THE HENRY WARD BEECHER LECTURESHIP

This lectureship was founded by Frank L. Babbott, M.A., of the Class of 1878, in honor of Henry Ward Beecher, of the Class of 1834. The incumbent is appointed annually by the Faculty for supplementary lectures in the Departments of History and the Political, Social, and Economic Sciences.

THE CLYDE FITCH FUND

A fund of twenty thousand dollars was established by Captain and Mrs. W. G. Fitch of New York in memory of their son, Clyde Fitch, of the Class of 1886. The income of this fund is to be used for the furtherance of the study of English literature and dramatic art and literature. The whole or part of this income is usually devoted to the remuneration of an eminent lecturer, who may also take a part in the regular instruction of the College.

THE JOHN WOODRUFF SIMPSON LECTURESHIP

A fund of \$150,000 was established in memory of John Woodruff Simpson, of the Class of 1871, by his wife and daughter. The income is to be used for fellowships (see page 114) and "to secure from time to time, from England, France or elsewhere, scholars for the purpose of delivering lectures or courses of instruction at Amherst College."

ADMINISTRATION

TERMS AND VACATIONS

The academic year includes thirty-six weeks of term time, divided into two semesters. There is a Christmas recess of two weeks and a spring recess of nine days. Commencement Day is the Monday after the third Sunday in June.

ATTENDANCE AT COLLEGE EXERCISES

The officer in general charge of matters concerning attendance on college exercises is the Dean of the College.

Attendance at class exercises is administered subject to the general regulation that a student is allowed in every course a number of absences not exceeding one-tenth of the number of exercises in that course.

The following rules apply in case a student exceeds this allowance:

For the first unexcused absence in any course a reduction of five per cent is made in the final grade for the year in that course. If in any semester a student, having used his allowance of absences in a course, takes two unexcused absences a reduction of ten per cent is made in his final grade for the year, and the student will be dropped from a course for the remainder of the year if in any semester he takes three unexcused absences.

All students must attend the chapel exercises held every week-day morning at ten minutes before eleven o'clock in Johnson Chapel, and at five o'clock every Sunday afternoon in the College Church. In reckoning the absences from chapel exercises an absence from a Sunday service counts double. Absences from chapel exercises are allowed as follows: (1) for Freshmen and Sophomores at the rate of three a week in each semester; (2) for Juniors and Seniors, at the

rate of four a week in each semester. Any student, on application to the Dean, may be excused from attending services at the College Church in order to attend church service elsewhere with the denomination of his choice. If the student is under twenty-one years of age, his application must be accompanied by a written request from his parent or guardian.

HEALTH AND PHYSICAL DEVELOPMENT

The officer having general supervision of student health and physical development is the College Physician.

The Department of Hygiene and Physical Education is under the charge of the College Physician, who keeps himself acquainted with the health of the students and provides for their proper treatment if ill. Each student soon after he enters College, and twice thereafter during his course, if he so desires, is given a careful physical examination and advised how to maintain his health and increase his physical efficiency.

Three hours a week of physical exercise are required of the Freshman, Sophomore, and Junior Classes until the spring recess. During the autumn the prescribed work is taken outdoors.

Instruction is given in swimming. Every student who on entering College cannot swim is required to learn during the first year, and before the end of Sophomore year to pass the college requirement in swimming, i.e., 100 yards, the start to be made by diving or jumping from the edge of the pool.

The results of this system of prescribed physical training, as shown by statistics systematically kept for more than sixty years, are eminently satisfactory.

An annual inspection is made of all fraternity houses with respect to their sanitary condition and safety in case of fire.

The College has an infirmary (see p. 135) with fourteen beds. It is in charge of the College Physician in all matters except treatment, for which any student is at liberty to employ a physician of his own choice. It contains an operating room for emergency surgical cases, and an isolation ward for treatment of infectious diseases. The matron, a graduate nurse, is ready at all hours during term time to relieve ill or disabled students, and to care for them pending any arrangements for special treatment.

Beginning with 1929-1930 a health-service charge of ten dollars will be made to each student. This will entitle him to one week's bed, board and general nursing. The service is optional in 1928-1929. Provision is made for a limited number of patients by funds given in aid of needy and worthy students, one in memory of Rev. Edmund K. Alden, D.D., of the Class of 1844, and one in memory of Rev. Thomas P. Field, D.D., of the Class of 1834.

Every case of illness, whether the student goes to the infirmary or not, must be immediately reported to the College Physician.

SCHEDULES, RECORDS, AND REPORTS

The officer in charge of records and reports is the Recorder of the College.

For the convenience of members of the College there is provided a printed schedule of all class exercises, a synopsis of courses for use when the election of studies is being made, and a set of rules and requirements that relate to the internal life of the College. These, together with copies of the annual catalogue, may be obtained at the Recorder's office.

Every student, upon admission to College, is given an Undergraduate Course Book in which is kept a record of his work in College. This course book is returned to the Recorder twice a year for additional records and verification.

Reports of standing are sent to parents or guardians at the end of each semester. Rank in each subject is reported as follows:

A, 90-100%; B, 80-89%; C, 70-79%; D, 60-69%; E, 50-59%; F, below 50%. The passing grade in each individual course is 60%, and an average grade of at least 70% is required for a degree.

The average grade for each year and the general average for all years are reported on the percentage basis.

EXPENSES

All communications concerning tuition, fees, and rental of rooms should be made to the Treasurer of the College.

TUITION

The charge for tuition, including the use of the library and gymnasium, is three hundred dollars for the year, payable in two instalments, one of one hundred and sixty-five dollars at the opening of the College in September, and one of one hundred and thirty-five dollars on or before February twenty-second.

Every student who takes an extra course in order to remove a delinquency incurred by a failure is required to pay an extra fee, at the rate of twenty dollars for a one-hour course for the year, forty dollars for a two hour course, and sixty dollars for a three hour course, estimated on the basis of credits allowed. Fifty-five per cent of this fee is payable at the opening of college in September, and the remainder on or before February twenty-second.

Every member of the Senior class is required to pay a graduation fee of six dollars on or before February twenty-second.

The charge for tuition for candidates for the degree of Master of Arts is three hundred dollars.

LABORATORY FEES

Yearly fees are charged in connection with laboratory courses in biology, chemistry, and physics as follows:

Biology 1	\$6.00
Biology 3	10.00
Biology 4	10.00
Biology 5	5.00
Biology 6	10.00
Biology 7	2.50
Chemistry 1	10.00
Chemistry 2	20.00
Chemistry 3	20.00
Chemistry 4	20.00
Physics 1	9.00
Physics 2	10.00
Physics 3	10.00
Physics 4	10.00

These fees must be paid when the classes are organized. Dues for breakage must be paid at the close of each semester.

ROOMS AND BOARD

The dormitories of the College accommodate about two hundred and fifty students, and the fraternity houses about two hundred and fifty.

The arrangement of rooms in the dormitories is such that they may be rented singly or in suites consisting of a study and either one or two bedrooms. Rooms in North College, South College and Morris Pratt Memorial Dormitory are unfurnished. Rooms in Morrow Dormitory are furnished. They are heated with steam and lighted with electricity, and most of them are provided with open fireplaces. The floors are hardwood.

Plans showing the arrangement of rooms in the various

dormitories, together with a detailed statement of prices, may be obtained from the Treasurer of the College.

A student who is occupying a dormitory room is allowed until April twentieth to reëngage it for the succeeding year. Beginning with April twenty-second, application will be received from any present occupant of a dormitory room for any dormitory room. Beginning May sixth, members of the College not now occupying dormitory rooms may apply in the following order: members of the incoming Senior class, May sixth; members of the incoming Junior class, May eighth; members of the incoming Sophomore class, May ninth. Beginning May thirteenth rooms will be rented as called for or they may be reserved for incoming Freshmen. Application for dormitory rooms should be made by incoming Freshmen as early in the year as possible, since assignment is made in order of application.

A payment of ten dollars is required when a room is engaged, this amount being credited on the account when the first payment is made. The balance of one-half of the yearly rental is payable at the beginning of the college year and the second half on or before February twenty-second.

Dormitory rooms may be rented only for the entire academic year even in cases of withdrawal from College. Applicants who are rejected at the June examinations will be released from their contracts, and deposits made to secure rooms will be refunded on written request to the Treasurer before August first. After the June examinations all applicants who engage rooms will be held responsible for the year's rental.

Dormitory rooms may be occupied on the Monday of the week in which the college year opens.

The prices charged for rooms include heat, water, and care by janitors. Electricity used in the rooms is paid for

by the occupants at the close of each term. The range of prices for the current year is as follows:

Single rooms \$90 a year minimum.

Study and one bedroom from \$150 to \$470 a year.

Study and two bedrooms from \$480 to \$520 a year.

Rooms may also be rented in private houses.

Board is furnished at various places in the town at prices which range from nine dollars to ten dollars a week.

A cafeteria dining-room in Morrow Dormitory accommodates about one hundred and fifty students.

STUDENT ACTIVITIES

Student activities, both athletic and non-athletic, are supervised by the Faculty Committee on Student Activities, through its Executive Secretary. The athletic activities are in immediate charge of the student council. A student tax (sixteen dollars in 1928-1929) is levied to support these activities. This entitles a student to free admission to all home athletic events.

SUMMARY

The following table shows three scales of annual expenditures, not including clothing, vacation expenses, laboratory charges, membership in fraternities and other student organizations, athletic tax, and incidentals:

Tuition	\$300.00	\$300.00	\$300.00
Room (one-half)	75.00	150.00	260.00
Furniture (annual average)	15.00	20.00	30.00
Board thirty-six weeks	324.00	342.00	360.00
Fuel and light	10.00	15.00	25.00
Infirmary fee	10.00	10.00	10.00
	\$734.00	\$837.00	\$985.00

HONORS

COMMENCEMENT EXERCISES

From the fifteen Seniors who have attained the highest general standing at the end of the first semester of Senior year, four are selected upon the basis of literary and oratorical merit to deliver orations on Commencement Day. The Bond Prize of one hundred dollars is awarded to the speaker who delivers the best oration.

THE BOND FIFTEEN FOR 1928

Paul Doughty Bartlett	James Anastasios Notopoulos
Edward Collins Bursk	Laurence Allan Lory Scott
James Randolph Chase	Howard Emanuel Shapiro
Alfred Gelstharpe, Jr.	Matthew Silverman

HONORS IN A SPECIAL SUBJECT

Honors in a single department of study are awarded for special work involving collateral reading or investigation under the following conditions:

(1) The candidate must do major work in the department in which he seeks honors. No student may be a candidate in more than one department.

(2) The candidate may begin his preparation in his Junior year and is advised to do so. He must begin it not later than the opening of his Senior year. In each year his

work must be under the direction of some one member of the department who will also advise the student in his selection of courses. Application for work leading to honors must be made at the Recorder's office on or before October first of the Senior year. The application must be accompanied by the written approval of a member of the department in which the work is to be done. Permission to be a candidate for honors may be withdrawn at any time by the department or the Administration Committee.

(3) To become a candidate, the student must have a general average of seventy-five per cent in his previous studies. The candidate must have at graduation an average standing of seventy-eight per cent in all studies of his college course.

(4) An incoming Senior of high standing who has shown in his Junior year conspicuous ability to profit by special instruction may petition for permission to reduce by one the number of courses required for his degree. Such a petition must be presented to the department in which the student is a candidate and recommended by it in writing to the Administration Committee for final action. This petition must be presented at the office of the Recorder before the end of the Junior year.

(5) The proficiency of the candidate is tested, at the option of the department, by special examination or by thesis, or by both, at the end of the Senior year. The thesis must be approved by at least two members of the Faculty. The recommendation of the department to the Administration Committee is based on the proficiency thus shown and on the candidate's record within the department.

(6) The honors examination may, by vote of a department, and with the approval of the Administration Committee, take the place of any final course examination in the department. The honors examinations take place

during the final examination period or in the fortnight preceding the opening of the final examination period.

(7) A successful candidate is recommended to the faculty for honors, high honors, or highest honors. A student who receives honors has one-half unit added to his total average rank; high honors, one unit; highest honors, two units. Except in special cases, a candidate is not recommended for high honors or highest honors if he has begun his preparation after the beginning of the second term of his Junior year.

Honors are entered on the Commencement program and announced in the annual catalogue.

HONORABLE MENTION

Honorable mention is awarded in the various departments under the following conditions:

(1) A standing of not less than seventy-five per cent attained in every department for the year.

(2) An average of ninety-three per cent maintained for a full year's course in the department in which honorable mention is sought.

The names of those who have honorable mention are announced in the annual catalogue.

FELLOWSHIPS

THE ROSWELL DWIGHT HITCHCOCK MEMORIAL FELLOWSHIP

Of two hundred and fifty dollars, established through the agency of the Alpha Delta Phi Fraternity, is awarded annually, under conditions determined by the Faculty, to a member of the Senior class for excellence in history and the social and economic sciences. The holder of the Fellowship pursues for one year, at an institution approved by the Faculty, a course of study in history or economics, to be completed within the period of two years next following graduation. The amount of the Fellowship is paid in two instalments, one on completion of one-half the year's work, the other at the end of the year.

THE RUFUS B. KELLOGG UNIVERSITY FELLOWSHIP

The gift of the late Rufus B. Kellogg of the Class of 1858, awards the income of about thirty thousand dollars for seven years to an alumnus of Amherst College, who shall be appointed upon the following conditions:

(1) He shall be elected by the Faculty from the members of the class graduated at the close of the academic year in which this election shall be made, or from the members of the classes graduated in the six years immediately preceding the academic year in which this election shall be made.

(2) The Faculty shall select as the incumbent of the said Fellowship the man who, in their judgment, is best equipped for study and research, without regard to any other consideration whatsoever, except that he shall have an especially good knowledge of the Latin and German languages.

(3) The first three years of the term of seven years the

incumbent shall spend at a German university (or with the approval of the Faculty of Amherst College, at any other place or places), in the study of philosophy, philology, literature, history, political science, political economy, mathematics, or natural science. The last four years of the term of seven years shall be spent as a lecturer at Amherst College. But the incumbent shall not give more than thirty lectures per annum, and shall not be required to reside at Amherst more than one college term of any year. The lectures shall be upon a subject selected by himself and approved by the Trustees and shall be given to the Senior class, but the members of all the classes shall have the privilege of attending; and the incumbent shall cause the lectures to be published at the end of his official term in good book form. He shall have no occupation or employment during the period of his Fellowship, except such as pertains to the duty of his Fellowship.

THE EDWARD HITCHCOCK FELLOWSHIP

Of one thousand dollars, was founded by the late Mrs. Frank L. Babbott of Brooklyn, N. Y., to promote graduate study in the department of physical education. Its object is to make the student familiar with the best methods of physical training, both in the gymnasium and on the field. The appointment is made by the Faculty.

THE AMHERST MEMORIAL FELLOWSHIP FOR THE STUDY OF SOCIAL, ECONOMIC, AND POLITICAL INSTITUTIONS

A Fellowship to perpetuate the memory of those Amherst men who gave their lives for an ideal. The following statement from the donor explains the purpose of this Fellowship:

“Realizing the need for better understanding and more

complete adjustment between man and existing social, economic, and political institutions, it is my desire to establish a Fellowship for the study of the principles underlying these human relationships.

"To be eligible for appointment to this Fellowship, a candidate should be a college or university graduate—though not of necessity a recent graduate. He should be a man of sound health. During his previous training he should have shown those qualities of leadership which are founded on strength of character. He should have given evidence of marked mental ability in some branch of the social sciences—economics, political science, and history—and have given promise of original contribution to his particular field of study. He should have demonstrated a spirit of service rather than ambition for personal advancement, and should intend to devote his life to the betterment of social conditions through teaching in its broad sense, journalism, politics, or field work.

"A Fellow shall be appointed every second year for a period of not more than four years, depending upon the qualifications and requirements of the individual candidate. It is earnestly desired that at least half of his appointment shall be spent in study in Europe. The last year, in part or in whole, depending upon the decision of the Committee in charge and the Board of Trustees of the College, shall be given to Amherst College. It is hoped that each Fellow shall at some time deliver a course of lectures at Amherst, and that these may be published.

"The Fellowship fund will provide \$2,000.00 a year for each Fellow.

"The Committee in charge shall be composed of five men: The President of the Board of Trustees of Amherst College, the President of Amherst College, and three others, to be appointed by them—one of whom shall be a member

of one of the Departments of Social Science at Amherst College. Of the two remaining members, at least one shall have no connection with Amherst College. One shall be a business or professional man, and one shall be definitely associated with some other college or university.

"It is desired to have this Fellowship meet the demands of existing social and intellectual requirements, and to this end the Committee may modify this original deed of gift every ten years. The donor reserves the right to consult with the Committee regarding suggested modifications. If at any time, in the opinion of the Committee, there is no further need for this Fellowship, the Fund shall be transferred to the General Endowment Fund of Amherst College."

THE JOHN WOODRUFF SIMPSON FELLOWSHIPS AND LECTURESHIPS

A fund of \$150,000 given in memory of John Woodruff Simpson of the Class of 1871, by his wife and daughter. The uses of the income as defined by the donors are as follows:

"1. To award to any graduate of Amherst College a fellowship for use in studying law at any school approved by the Board of Trustees of the College;

"2. To award to any graduate of Amherst College a fellowship for use in studying medicine at any school approved by the Board of Trustees of the College;

"3. To award to any graduate of Amherst College a fellowship for use in studying theology at any school approved by the Board of Trustees of Amherst College, without regard to the particular creed or particular religious belief taught thereat;

"4. To award to any graduate of Amherst College a fellowship for use in graduate study at the universities of Oxford or Cambridge in England;

"5. To award to any graduate of Amherst College a fellowship for use in graduate study at the Sorbonne in Paris;

"6. To secure from time to time from England, France or elsewhere scholars for the purpose of delivering lectures or courses of instruction at Amherst College."

THE FORRIS JEWETT MOORE FELLOWSHIPS

These fellowships, three in number, were given in memory of Forris Jewett Moore of the Class of 1889 by his widow, Emma B. Moore.

(a) A fund of ten thousand dollars, the income of which is to be used to assist some graduate of Amherst College who has distinguished himself in the study of chemistry while an undergraduate and desires to engage in further study of that subject, preference to be given to eligible candidates whose plans lie in the field of organic chemistry. The beneficiary is to be a member of the graduating class of the year preceding that in which he holds the fellowship.

(b) A fund of five thousand dollars, the income of which is to be awarded to a graduate of Amherst College who has distinguished himself in the study of history while an undergraduate and desires to engage in further study on that subject. The beneficiary is to be a member of the graduating class of the year preceding that in which he holds the fellowship.

(c) A fund of five thousand dollars, the income of which is to be awarded to a graduate of Amherst College who has distinguished himself in the study of philosophy while an undergraduate and desires to engage in further study on that subject. The beneficiary is to be a member of the graduating class of the year preceding that in which he holds the fellowship.

FELLOWSHIPS AWARDED BY THE AMERICAN SCHOOLS OF CLASSICAL STUDIES AT ATHENS AND ROME

The attention of graduate students interested in the Classics and in Archaeology and Ancient Art is called to the opportunities offered by the American Schools of Classical Studies at Athens and Rome. As the College contributes regularly to the support of these schools, any Amherst graduate may enjoy the privileges of study at either school without charge for tuition and may compete for the annual fellowships which they offer. Further information may be obtained from any classical teacher at the College.

PRIZES

The following prizes are offered annually for proficiency in the work of the several departments of collegiate study:

ENGLISH

THE ARMSTRONG PRIZE, of fifty dollars in books, given by Collin Armstrong of the Class of 1877, in memory of his mother, Miriam Collin Armstrong, to members of the Freshman class who excel in composition.

Awarded in 1928 to William Allen Atkins.

SCHOLARSHIPS AND BENEFICIARY AID

The officer directly in charge of the administration of scholarships and beneficiary aid is the Dean of the College.

The beneficiary funds of the College aggregate seven hundred and fifty thousand dollars. The income of these funds is distributed annually, among students of high character and good scholarship who need pecuniary aid.

Aid from beneficiary funds is given to students who maintain a high standard of honor, who, in the preceding year, passed all their courses with an average grade of not less than seventy per cent, whose habits are economical, and who are candidates for a degree.

Awards are paid in instalments, at the beginning of the college year and in the middle of February.

Applicants for scholarships in the three upper classes must file at the Dean's office, on or before June 1, an account of their income and expenditures for the current year, and a statement of their resources for the following year.

Applicants for the renewal of scholarships must present an account of their expenditures and income for the current year.

Scholarships are of three grades: three hundred dollars, two hundred and seventy-five dollars, and two hundred and fifty dollars, the amount being credited on tuition bills. Scholarships of the first grade are awarded to students whose average standing is A (90% to 100%); of the second grade, to students whose average standing is B (80% to 90%); of the third grade, to students whose average standing is C (70% to 80%).

SCHOLARSHIPS FOR INCOMING STUDENTS

More than fifty scholarships are awarded annually to applicants for admission to college who are in need of financial

aid and who meet in full the entrance requirements. These scholarships are awarded for the first half year and entitle the recipient to a credit of one hundred and forty dollars on the first bill for tuition. The continuation of each scholarship for the second half of the year depends upon the student's grade for the first semester, and, when granted, involves a credit on the second bill for tuition in accordance with the following schedule: for a grade of C, one hundred and ten dollars; for a grade of B, one hundred and thirty-five dollars; for a grade of A, one hundred and sixty dollars.

Blanks for application may be obtained from the Dean, and, when filled out by the applicant, must be accompanied by two letters concerning need, character, and attainments. One of these letters should be from the principal of the school.

Awards are made from the income of the following funds:

THE CHARITABLE FUND, \$100,000, primarily in aid of those studying for the Christian ministry. Any surplus income may be awarded to other students in the classical course.

THE CHARLES MORTON MERRILL FUND, \$100,000, for financial aid and assistance to deserving students of Amherst College, established by Charles Edward Merrill of the Class of 1908 in honor of his father whose name it bears.

The Class of 1849	The Class of 1857	The Class of 1869

THE COMPOSITE FUND, established jointly by the following classes:

The Class of 1829	The Class of 1838	The Class of 1867
The Class of 1835	The Class of 1866	The Class of 1870

THE EMILY B. RIPLEY SCHOLARSHIP FUND, the bequest of Emily B. Ripley of Royalston.

THE JOHN C. KIMBALL CLASS OF 1854 FUND, the bequest of John C. Kimball of Greenfield.

Funds yielding the following amounts annually:

THE STATE SCHOLARSHIPS, three, covering full tuition.

THE ADAMS SCHOLARSHIPS, three of \$40 each, the bequest of Asahel Adams of North Brookfield.

THE LA VERNE NOYES SCHOLARSHIPS

There are fifteen of these scholarships, each covering full tuition, awarded to those who are citizens of the United States of America and who *First*, shall themselves have served in the army or navy of the United States of America in the war into which our country entered on the 6th day of April, 1917, and were honorably discharged from such service, or *Second*, shall be descended by blood from someone who has served in the army or navy of the United States in said war, and who either is still in said service or whose said service in the army or navy was terminated by death or an honorable discharge.

STUDENT LOAN FUND

Through the liberality of friends of the College, provision is made for loans of a limited amount to a few students in the later years of the course, at a low rate of interest, upon notes acceptably endorsed and payable one or two years after graduation. In accordance with the conditions imposed by the donors of the Loan Fund, its use is limited to students of thorough scholarship whose habits of expenditure are economical.

Application blanks may be obtained at the Treasurer's office. It is the policy of the committee not to make any loan until at least one term of the college course has been completed.

BUILDINGS AND GROUNDS SITUATION

The town of Amherst lies in the Connecticut Valley about one hundred miles west of Boston, and almost the same distance north of New Haven, on the eastern border of the valley, some four miles from the river. The college stands on top of a hill with a broad outlook from any building and from most points on the grounds, over town and valley, across fertile meadows stretching away to the Holyoke Range on the south, the Hampshire and Berkshire Hills on the west, Sugar Loaf and Mount Toby on the north, and the Pelham Hills, including Mount Lincoln, on the east. Most of the buildings are on the hill, grouped about the Campus. On the other side of Pleasant Street, the main thoroughfare of the town, are the Morgan Library, College Hall, and the President's House. About five minutes' walk from the Campus are the Observatory, Pratt Field, the Indoor Athletic Field, and the Faculty Club. The Pratt Health Cottage is farther away, on the northern edge of the town.

BUILDINGS AND EQUIPMENT

The buildings about the Campus are the dormitories, library, laboratories, chapel, church, gymnasium, and the buildings used for the class-rooms and administrative offices. Walker Hall, which is the focus of most of the paths on the grounds, contains the offices of the President, the Dean, the Secretary, the Treasurer, the Recorder, and the Secretary of the Alumni Council, and many class-rooms. Barrett Hall has class-rooms for German and Romance languages; Williston Hall for Latin, Greek, and English. Appleton Hall contains the Biological Laboratory, several large lecture rooms, and

class-rooms for general use. Other class-rooms are in the chapel building, the Octagon, and the laboratory buildings.

The Converse Memorial Library was first opened for use in the autumn of 1917. It has dignity and beauty, besides ample space and equipment for the convenience and comfort of all who use the library. The total book capacity is 300,000 volumes. The reading and periodical rooms will accommodate one hundred readers at a time. The Converse or "browsing" room is lined with open shelves among which the students may explore for themselves as they might in well-filled libraries in their own homes. The Clyde Fitch room is a replica of the dramatist's study as it was in his house in New York. Much space has been devoted to the department rooms, of which there are eleven provided for such study, research, and seminar work as may be done with the book collection close at hand. The book collection at present numbers about 150,000 volumes, freely available to students.

Fayerweather Laboratory houses the departments of physics and chemistry. In the south wing the Department of Physics has a large lecture room with apparatus rooms adjoining, library and reading room, recitation room, laboratories for elementary experimental work, for work in electricity and for research, a balance room, dark rooms for photographic and for general work, an optical room, and a spectroscope room equipped with a concave grating spectroscope. In the basement are battery rooms, a room for special researches, a workshop and dynamo room with electric and water power. In the north wing of the building, the Department of Chemistry has general lecture and recitation rooms, a library and reading room, laboratories for general, analytical, and organic chemistry, and also a complete equipment for water and gas analysis.

The biological and geological laboratories occupy a large

building on the south side of the Campus, commanding a wide and varied view which affords ready illustrations of many geological phenomena. Besides lecture and class-rooms, laboratories and work rooms, the building contains the museums of the two departments. In the biology museum are the Adams collection of shells, a part of Audubon's celebrated collection of birds, a synoptic collection of the animal kingdom, and a collection of fossil vertebrates. The geology museum includes the Woods Cabinet, containing about twenty-five thousand specimens of minerals, a general American and European historical geology collection, the State Survey collections of New Hampshire, Vermont, Massachusetts, and Connecticut, the Shepard meteorite collection, and a collection of fossil vertebrates. In another room is shown the Hitchcock Ichnological collection of some twenty thousand tracks of animals in stone. The anthropological collection, and an unusually complete and interesting collection of Indian relics have been transferred from Appleton Cabinet to this building.

Appleton Hall formerly known as Appleton Cabinet, has undergone changes that will provide greatly improved quarters for the department of Botany, and a number of modernized recitation rooms for general purposes. The building was erected in 1855 to house President Hitchcock's Ichnological collection. For some years past it has held the Gilbert collection of Indian Relics. The entire interior has been reconstructed. On the second floor there is a botanical laboratory, a library, an herbarium large enough to hold the present collection with room for its growth, a private laboratory and office for the instructor, and two class-rooms. The upper floor contains two large lecture rooms and the ground floor contains four good-sized class-rooms, and offices for the Committee on Student Activities and the Superintendent of Buildings and Grounds.

The Observatory has two domes, the larger of which, thirty-five feet in diameter, houses an eighteen-inch Clark telescope. The smaller has a seven and one-fourth inch refractor. The equipment comprises also an altazimuth, two transits, with the usual accessories for meridian observations, and instruments for instruction in the theory and practice of navigation.

The Chapel and the College Church stand respectively on the west and the east borders of the Campus. Morning exercises are held in the Chapel on week-days, and regular Sunday services in the Church.

The Octagon is used exclusively by the Department of Music. It has rooms arranged for class, practice, and chorus and orchestra rehearsal. A grand piano and an Aeolian orchestrelle are provided for use in classes, and by students for purposes of study.

North and South Colleges, and Morris Pratt Memorial Dormitory, are the college dormitories at present. The two former are two of the oldest, and the latter one of the newest, of the college buildings. All three buildings are heated by steam and lighted by electricity. Most of the rooms have open fireplaces, and all have hardwood floors. Morris Pratt Memorial Dormitory is of fire-proof construction throughout, and has a large and beautiful resort room on the first floor. The dormitories have single rooms and suites consisting of a study and one or two bedrooms.

Morrow Dormitory, the gift of Mr. and Mrs. Dwight W. Morrow, is designed to house sixty-three students and one member of the faculty. Each student lives in one room, a combination of study and bedroom, with a separate lavatory attached. A welcome innovation is the dining-room, which with a kitchen, pantry, and a large common room occupies the first floor.

College Hall is a large colonial building, once the village

church, now the main assembly hall of the College. It is used for the Commencement exercises, and for all the larger gatherings, such as student mass-meetings, and public lectures.

The Mather Art Museum occupies the third floor of Williston Hall, and the vestibule and stairway leading to it. It consists of plaster casts, principally of Egyptian, Mycenaean, Greek and Roman sculpture, with a number of examples of Renaissance and later sculpture, both in relief and in the round. Further resources for the study of art are found in the library, and in some of the class-rooms. In addition to the catalogued books and photographs, there are in the vestibule of the Morgan Library building several Assyrian slabs, with inscriptions in cuneiform characters, which were obtained by the late Henry Lobdell, D.D., of the Class of 1849, from the walls of the palace of Assurnazirpal at Nimroud. The Latin and Greek rooms in Williston Hall have many casts in bronze and plaster, as well as collections of photographs, engravings, and stereopticon slides.

The Pratt Gymnasium contains, in the main building, a hall with space and apparatus for general and specialized exercises, the offices of the Department of Physical Education, a fencing and wrestling room, a sparring room, and a rifle range. A wing known as the Pratt Natatorium contains a swimming-pool seventy-five feet long and twenty-two feet wide, and large and small squash-racquet courts.

Hitchcock Memorial Field, of about forty acres, named in honor of Dr. Edward Hitchcock, '49, adjoins the Gymnasium. It contains twenty-four tennis courts, two basketball courts, and four large fields for baseball, football, or soccer. In addition there are areas and equipment for intramural track and field athletics. This field accommodates three hundred students in the different forms of exercises at one time.

Pratt Field, given to the College by Frederic B. Pratt of the Class of 1887, has an area of about thirteen acres, and is used chiefly for intercollegiate games. It has a quarter-mile track and space for field contests, a baseball diamond, football grounds, and tennis courts. The grand-stand seats about five hundred, and has dressing-rooms and shower baths for contestants. There is also a bungalow equipped with dressing rooms and shower baths for the use of visiting teams.

The Indoor Athletic Field was completed in March, 1925. It is located on the western side of Hitchcock Field and is one hundred and sixty feet square and eighty feet high at the peak. The roof is of glass and slate furnishing ample light without bad cross light. There is a running track on the dirt floor twelve feet wide protected by netting. Within is an area one hundred and thirty-six feet square, large enough for infield baseball practice or for field events. The cage is fully equipped. In an adjoining building there are an office, lockers, and shower baths. The property adjoining the cage on the north and fronting on South Common has been secured by the College for erecting later a new gymnasium.

Between Pratt Field and the Observatory lies a tract of woodland known as Hallock Park, and Blake Field, which from 1881 to 1890 served as the main athletic field of the College.

The Mount Doma golf course, five minutes' walk south of the College, was given to the College by Mortimer L. Schiff of the Class of 1896. The course is maintained by the Amherst Golf Club, an organization of students, faculty, and townspeople.

Pratt Health Cottage is the college infirmary. It stands on high ground north of the College, commanding a wide view in every direction. Its space and equipment are

sufficient for the accommodation and care of students temporarily disabled by accident or disease.

The Lentell House, at the foot of Chapel Hill west of the Campus, has been remodeled to serve as a Faculty Club House, with a much needed College Guest-Room.

The Central Heating Plant by means of underground feed pipes heats all the buildings on the Campus (except the Octagon, College Hall and Morgan Library.) Automatic coal handling machinery has been installed to facilitate the operation of the plant.

PUBLICATIONS

COLLEGE PUBLICATIONS

The annual *Catalogue* is sent to the alumni of the College, to schools from which students are received, and to any who ask for it.

The annual Report of the President, Dean, Librarian, College Physician, and Treasurer, is issued in the autumn.

An address list of living alumni is issued once in two years.

A record of graduates deceased during the year is issued annually in Commencement week.

Amherst Biographical Record, a complete and authoritative account of every one who has been connected with the College since its founding (1821-1921)—trustees, faculty, administrative officers, graduates, non-graduates and honorary graduates. It was published by Amherst College in 1926 under the auspices of the Alumni Council and under the editorship of Robert S. Fletcher '97 and Malcolm O. Young '16.

THE AMHERST BOOKS

As part of the celebration of the one hundredth anniversary, the College began the publication of a series of volumes written by Amherst men to be known as THE AMHERST BOOKS. Orders for any of these books may be sent to the Managing Editor, Professor H. H. Plough, Amherst, Mass.

THE AMHERST BOOKS, FIRST SERIES

The Liberal College by Alexander Meiklejohn

The Life Indeed by John F. Genung

Essays in Biblical Interpretation by Henry Preserved Smith

Germany in Travail by Otto Manthey-Zorn

Parties and Party Leaders by Anson D. Morse with an introduction by Dwight W. Morrow

The Coming of Man by John Mason Tyler

Religion in the Philosophy of William James by Julius Seelye Bixler

THE AMHERST BOOKS, SECOND SERIES

The Miner's Freedom by Carter Goodrich

The Evolution of the Horse by Frederic Brewster Loomis

STUDENT PUBLICATIONS

A *Handbook*, published and distributed annually by the Christian Association, contains information chiefly useful to new students.

A semi-weekly paper, *The Amherst Student*, containing college news, accounts of games, notices of alumni, and discussion of college affairs, is issued by an editorial board of students.

The Amherst Book of Undergraduate Verse is published annually under the auspices of The Poetry Society of Amherst College. The poems in the book for the most part are poems which were submitted and read at the monthly meetings of the Poetry Society.

The Amherst Writing, conducted by students, contains articles, essays, poems, stories, and book notices.

The Olio, published annually by the Junior class, contains names of the members of fraternities, of officers and members of athletic, musical, literary, and dramatic organizations, of students receiving prizes and honors, and various matters of interest to the College.

Amherst's humorous publication, *Lord Jeff*, is published six times a year.

ALUMNI PUBLICATIONS

The Amherst Graduates' Quarterly is published by the Alumni Council in November, February, May and August. It contains articles of educational value, news of the alumni,

accounts of undergraduate activities, reviews of books, and various matters of interest to alumni. Communications for the editors, as well as all business communications, should be addressed to *Amherst Graduates' Quarterly*, Box 549, Amherst, Mass.

The *Amherst Memorial Volume*, a record of Amherst men in the World War, was published by the College under the auspices of the Alumni Council in 1926. The book contains an introductory essay, "A College in War Time," accounts of the Amherst Unit Medical Reserve Corps, the Amherst Unit of the American Field Ambulance Service, the Wounded and Decorated, a sketch of the Amherst Dead, and a record of the Amherst members of the military, naval and air forces of the United States. It is edited by Claude M. Fuess, Ph.D., '05, instructor in English at Phillips Academy, Andover, and formerly a major, U. S. A. It contains an introduction by President-Emeritus George Daniel Olds, LL.D.

Amherst College Songs was published by the Alumni Council of Amherst College in 1926. The collection includes many old campus favorites which are now put into print for the first time in the manner in which they were formerly sung in their heyday. There are, besides, many songs never before available in print for the general Amherst public. The volume is edited by William P. Bigelow, '89, Professor of Music in Amherst College, with an introduction by William A. Vollmer, '09, and is illustrated with scenes of Amherst Life.

Amherst Alumni Council News is published in October, December, February, March, May and July. It contains reports of the work of the Alumni Council and current news of the College. Communications for the editor should be addressed to *Amherst Alumni Council News*, Box 549, Amherst, Mass.

UNDERGRADUATE ORGANIZATIONS

In addition to the usual literary, dramatic, musical, athletic and social organizations of the College, there exist at Amherst also the following:

The Poetry Society of Amherst College, a voluntary organization of verse writers drawn from the four undergraduate classes. It was formed in 1926 and has thriven with increased numbers and with increasingly meritorious output continuously since then. The Poetry Society of Amherst College is a branch of the Poetry Society of America, and the plan of monthly meetings in the Amherst Society is copied from the procedure followed by the national body. The Amherst Society sends a representative to the meetings of the national body, which are held once a month in New York City. Since the membership of the national body is composed of the most distinguished of American poets, the members of the Amherst Society have an opportunity in this way to meet the finest poets of their own day.

The Amherst College Clerical Club, organized in 1926, to whose membership is welcome any student who is seriously considering some form of religious work as a career. The club holds monthly dinners at the Lord Jeffery Inn, at which men who have achieved eminence in the religious world are invited to address the members and answer questions. A special effort is made each fall to reach the Freshmen who come to College with some thought of entering the ministry in later years.

The Amherst College Classical Club, founded in 1924, which meets once a month for discussion and the reading of papers presented alternately by undergraduate and faculty members. Elections to the club are controlled by the undergraduate members.

The Liberal Club, an informal organization open to the student body of Amherst College, formed for the purpose of fostering thought on and discussion of current social problems. Representative speakers are secured to present the various points of view on the problem under discussion. It has the support and coöperation of the administration and members of the faculty.

The Cosmopolitan Club, organized in 1926 for the purpose of promoting international understanding and good fellowship among Amherst students. Monthly meetings are held at which noted lecturers are invited to speak and to lead the club in round table discussion. The Amherst organization is one of the constituents of the Joint Cosmopolitan Club which includes also Smith College, Mount Holyoke College, The American International College, and The Massachusetts Agricultural College. Once a year a joint meeting is held which the Cosmopolitan members of the nearby colleges are invited to attend. Membership in the Amherst branch is open to all foreign students and to others interested in international affairs.

The Outing Club, an organization of students and faculty for the purpose of hiking, mountain climbing, skiing and snowshoeing. The club arranges trips, makes and maintains trails, and has a cabin on Mount Toby as its headquarters.

RAILROAD CONNECTIONS

The Central Massachusetts Division (Boston to Northampton) of the Boston and Maine Railroad and the Central Vermont Railroad, connecting at Palmer with the Boston and Albany Railroad, pass through Amherst. Visitors to Amherst arriving at Springfield on the New York, New Haven and Hartford or on the Boston and Albany Railroads will find the most convenient method of reaching Amherst to be by Boston and Maine train to Northampton and by trolley from Northampton to Amherst.

VISITORS

Visitors are always welcome at Amherst College. During the months of July and August the college employs a student guide who may be found at the Christian Association Rooms from eight-thirty A.M. to five-thirty P.M. The services of the guide are without fee.

During the remainder of the year a guide will be furnished without charge upon application at the Office of the Secretary, Number 11, Walker Hall.

INFORMATION

Requests for information should be addressed to the Secretary of the Faculty, Amherst College, Amherst, Mass.
